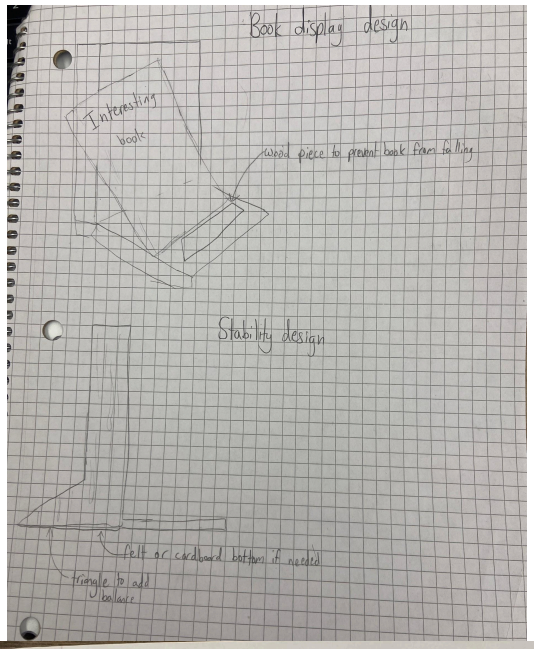
Element D: Design Concept Generation, Analysis and Selection

To start out our designing process, we assigned several artists to use the research from the portfolio and information conveyed by the researchers to draw an initial design. We then evaluated these designs using a Gantt chart and then decided to vote on one to improve and build upon.

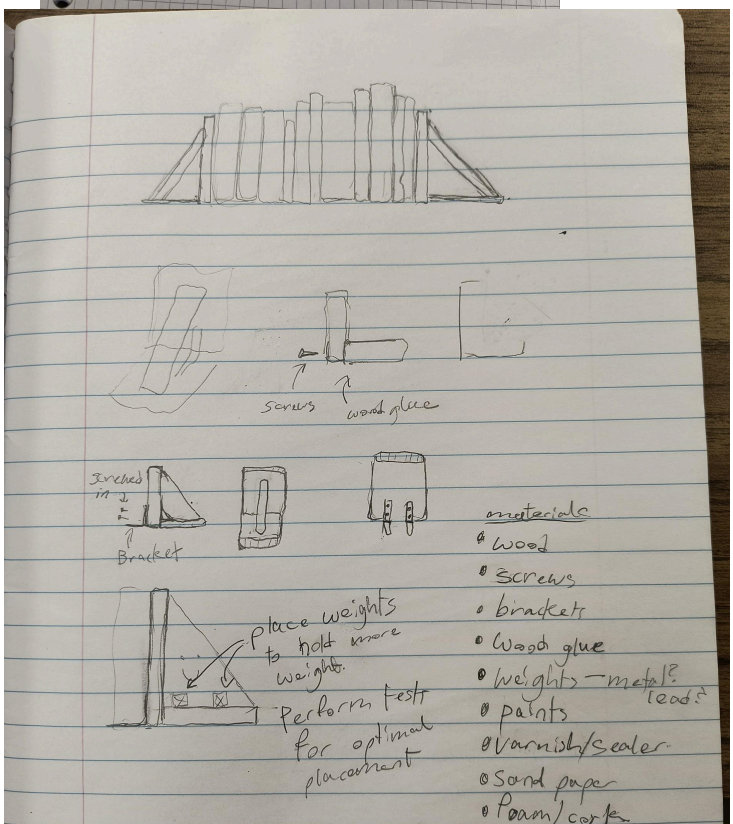
Photos of Initial Designs:

Design 1 - 4/5



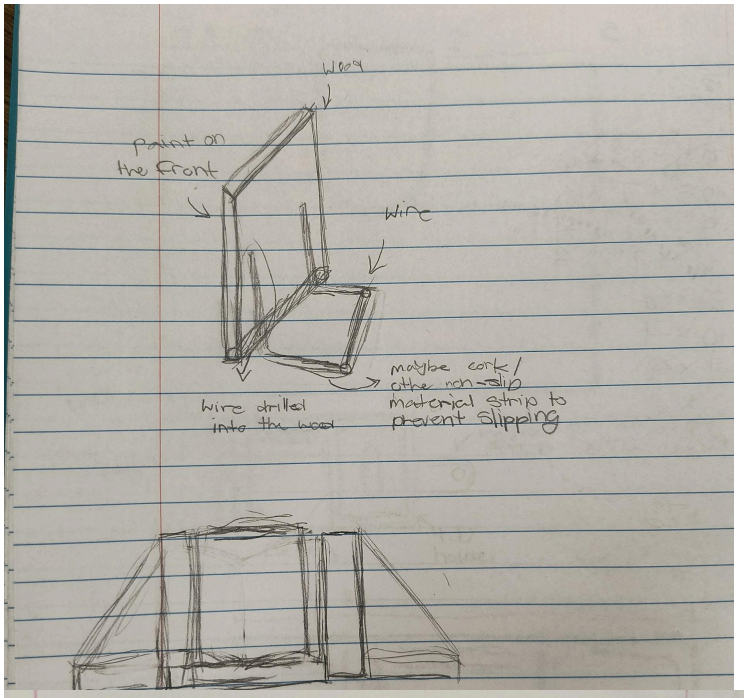
The first design was created by Miracle and it was a brief display format combined with a book end.

Design 2 - 4/5



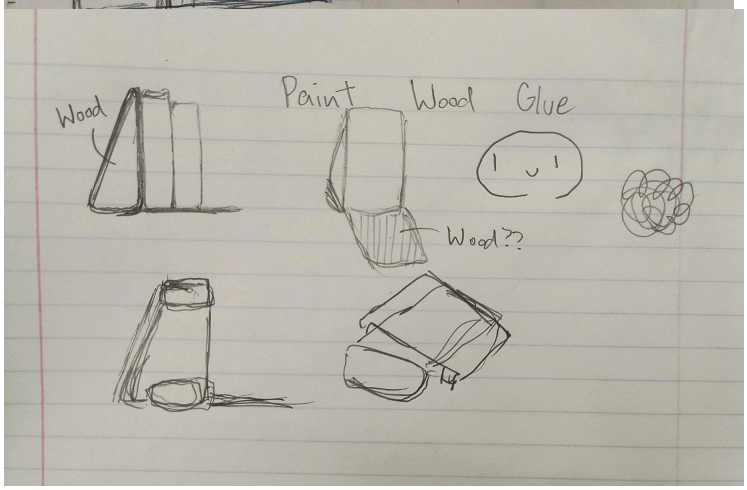
This design was created by Stpehen and we all agreed that it was good but we could improve on the design itself. We took inspiration from the materials he listed to be a part of our final design if needed.

Design 3 - 4/6



This design was created by Zion and was the design we decided to improve upon by combining some aspects of Stephen's design.

Design 4 - 4/5

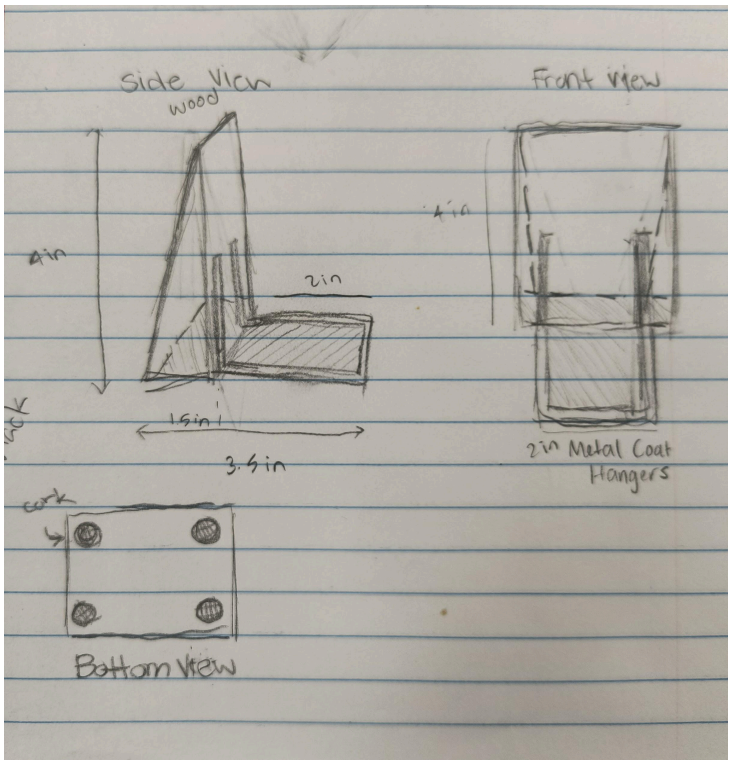


This was the design created by Rin that we decided to incorporate regarding the bottom of the book end itself.

Designs Analysis

	Prototype 1	Prototype 2	Prototype 3	Prototype 4
Strength (/5)	2/5	4/5	4/5	3/5
Recyclable (/5)	3/5	4/5	4/5	3/5
Stability (/5)	2/5	4/5	4/5	2/5
Longevity (/5)	4/5	3/5	4/5	3/5
Stationary (/3)	2/3	3/5	2/3	1/3
Design (/3)	1/3	2/3	2/3	1/3

Final Design - 4/9



<u>Design Specifics</u>

Materials Needed

- Wood 5 in x 4 in
- Sandpaper
- Acrylic Paint (colors tbd)
- Metal Coat Hangers 12 in
- Paint Sealer \ Mod Podge

- Primer
- Super Glue/ Hot Glue
- Screws
- Screw Clamp Connector
- Cork or Felt Pads
- Resin

Equipment

- Miter Saw
- Hand Drill
- Paintbrushes
- CNC Machine (for decoration)
- Measuring Tape

Cost

- All materials are refurbished

Steps

1. Create the triangle block of wood by cutting and gluing as needed
2. Refurbish hangers or general wire to create the standing 90 degree upright part
3. Create the resin bottom by creating a barrier of tape or using a silicone mold
4. Paint and decorate as needed with the cnc machine to make engravings and paint to further customize
