

Element H

- The amount of sun on the plants per day
- 7 trials
- How much growth in a day (in cm)
- If the plants do not grow their average growth. Its not a success
- Can we water the plants as well as monitor their sunlight

Element H: Prototype Testing and Data Collection Plan

Requirements	Testing & Setup	Test Cases	Expected Results	Criteria Goal
Mobility	1)Turn on 2)Censors cause the shade to move in directed place	Leave for a week # of trials - 7	Will move at the desired times	Fail : Doesn't move at all or in right spot Pass : Moves with delay or has gaps Goal : On the dot and covers everything
Programmable	1)Turn on 2)Make sure that motor moves shades the plant when the sensor is under direct sunlight	# of trials - 10	Shade moves to desired place	Fail : Doesn't move at all or in right spot Pass : Moves with delay or has gaps Goal : On the dot and covers everything
Size	1)Measure		Fit parameters	Fail : To big or small Goal : Fits the Parameters
Power Supply	1)Put batteries in pack 2)Turn on	Test for 1 week	Stays powered on for one week	Fail : Doesn;t make it to a week Pass : Stays on for one week

				Goal : Stays on for longer than a week
Weight Capacity	Add 10 lbs	Test 10 Times	Holds 10 lbs	Fail : Doesn't hold 10 lbs or breaks Pass : Holds 10 lbs Goal : Holds more than 10 lbs
