https://www.google.com/url?sa=i&url=https%3A%2F%2Fwww.reddit.com%2F%2Fbadminton%2Fcomments%2Fow62ji%2Fguy_says_this_racquet_broke_from_a_mishit_frame%2F&psig=AOvVaw3E7pjmjy1!!AQvonnUGGp9&ust=1706227845625000&source=images&cd=vfe&opi=89978449&ved=0CBEQjRxqFwoTCJj2nZug94MDFQAAAAAdAAAAABAD

This design includes an ordinary badminton racket with a 90 degree bend and attachments to make it longer. The 90 degree bend can help retrieve the birdies easily.

However, this attempt failed because the device was long enough. The racket measured three and a half feet, but failed to work in a 20 foot gym.

Prior Design Attempt #2 - <Shoe throwing>

Todd Kelley, (2020, November 6), *Watch: Champions rules official throws a shoe to get a ball out of a tree*

USA Today Sports is an official sports network and broadcaster.

<https://golfweek.usatoday.com/2020/11/06/pga-tour-champions-rules-official-throws-shoe-ball-tree/>

https://www.azernews.az/media/pictures/shoe_throwing.jpg

Name: I Forgot Team Date: _____ Class: _____

Shoe throwing is a simple way to knock birdies down. It includes removing footwear off of a foot and aiming it at a birdie, and ultimately launching it to knock it down.

Analysis-

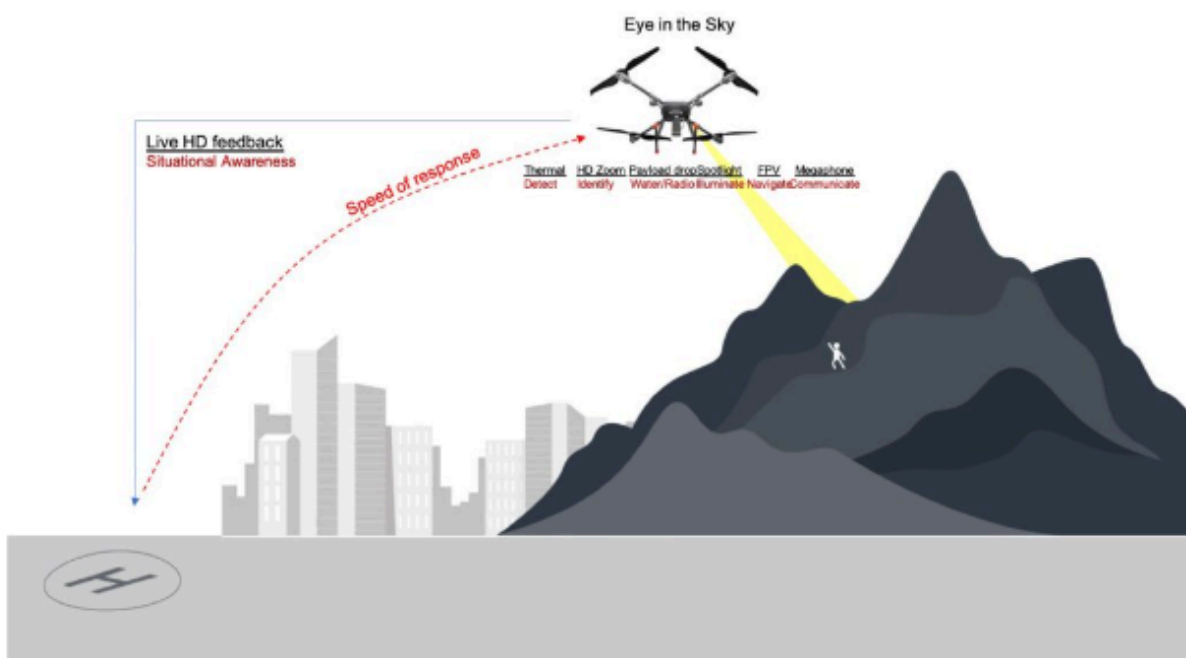

Although it is a simple design, it requires nearly perfect accuracy and strength to perfectly hit and knock the birdie off. You also risk losing a shoe by getting it stuck as well.

Prior Design Attempt #3 - <Rescue Drone>

Airborne Drones, (2024), *Search and Rescue Drone (UAV)*

Airborne Drones is an official rescue drone corporation and manufacturer.

<https://www.airbornedrones.co/search-and-rescue/>

Name: I Forgot Team Date: _____ Class: _____

Include main details about this prior design attempt

<https://www.airbornedrones.co/wp-content/uploads/2020/10/search-and-rescue-1024x618.jpg>

Rescue drones are airborne machines that can be used to locate things at high altitudes.

Although using drones may seem like a good idea, rescue drones are meant to spot things, rather than physically move them. Commanding the drone to get involved with physical engagement can damage it.

Rubric

Element B: Documentation and Analysis of Prior Design Attempts						
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
B1. Documentation of plausible prior attempts to solve the problem and/or related problems is drawn from _____.	a wide array of clearly-identified and consistently-credible sources	a variety of clearly-identified and consistently-credible sources	several—but not necessarily varied—clearly-identified and generally-credible sources	a limited number of sources, some of which may not be clearly identified and/or credible	only one or two sources that may not be clearly identified and/or credible	missing or minimal (a single source that is not clearly identified and/or credible)
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
B2. The analysis of past and current attempts to solve the problem — including both strengths and shortcomings — _____.	is consistently clear, detailed, and supported by relevant data	is clear, generally detailed, and supported by relevant data	is generally clear and contains some detail and relevant supporting data	is overly general and contains little detail and/or relevant supporting data	is vague and is missing any relevant details and/or relevant supporting data	cannot be inferred from information intended as analysis of past and/or current attempts to

						solve the problem
