Element B Initial Template

How to use this template

Teachers: You may customize this document before providing it to students.

Students: The template below is one way to structure your research findings around past and current attempts to solve the problem, but the specific assignment given by your instructor may require a different structure or dictate different details. If you make a copy of this template to edit for your own research into prior design attempts, be sure to delete the instructions.

Element B: Documentation and Analysis of Prior Design Attempts

Prior Design Attempt #1 - Corsi Rosenthal

Details

This is a DIY method and cost effective way of building an air filter. This cleans out pollen, dust, and airborne particles.

Analysis

Name: _____

Date: _____

Class: _____

This is effective at removing less harmful air particulates and at a cheap cost while being easy to assemble.

Prior Design Attempt #2 - Coway Airmega AP-1512HH Mighty

Details

This one is very proficient at cleaning smaller rooms, and is still very quiet.

Analysis

This one would be better if we made multiple of them

Details

This purifier is effective in medium sized rooms, but doesn't work as well as the above purifiers

Name: _____

Date: _____

Class: _____

Analysis

This model isn't as effective as the others, but it is cheaper

Prior Design Attempt #5 - <insert name of prior design attempt #5>*Source*

Details

This filter is smaller, but just as effective in small rooms. They use a remote start from an app, and is a very energy efficient filter.

Analysis

This would work well if we had multiple of them, they are easy to turn on and off
