Element B: Documentation and Analysis of Prior Design Attempts

Prior Design Attempt #1 - Tying together the the drawstings

Source: [The Beyond Easy Way To Save Your Favorite Hoodie's Strings From Tangling In The Wash](#) - House Digest.

<https://images.app.goo.gl/KfPKYsrwy2YiqPyF7> - YouTube

Tie the hoodie strings together into a bow to prevent the ends from getting lost in the hood

Analysis

Despite it working, it is hard to remember to tie the strings together each time. Stakeholders have tried it but although it is successful, it is hard to remember to do this for every single hoodie they own.

Prior Design Attempt #2 - Making fancy knots at the ends of the drawstrings

Source: https://stsellov.xyz/product_details/46784094.html - St sell shop

St sell shop

Using each end of the drawstring, tie it in a fancy matter. Then it is fashionable and does not get lost in the hood

Although this method also works, we found that by tying the strings like so, the strings do not get dried completely, and in the end, it becomes damp and smells. Another one of our stakeholders mentioned how tying knots at the strings can also lead to damaging the hoodie itself.

Prior Design Attempt #3 - Connected drawstrings

Source: Hoodlaces - [Hoodlaces](#)

Name: _____

Date: _____

Class: _____

Hoodlaces - July 4th paracord

Strings made of a thicker material that are more sturdy and catches to the hood more. Then at the ends, are twisting caps that can be connected together made of metal.

Although it is also a suitable solution, as mentioned before, it is difficult to remember to always attach the two parts together before putting it to wash. Furthermore, a material made from metal might not be long lasting, or possibly cause scratching in the washing and dryer machines.

Prior Design Attempt #4 - Crochet hook

Mr. Steinhorn

Name: _____

Date: _____

Class: _____

Use the hook to grab onto any parts of the string and then try to dig the string out

Although the solution solves to problem, it is not practical. It takes too much time to fish around for the string and try to get it out.

Rubric

Element B: Documentation and Analysis of Prior Design Attempts						
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
B1. Documentation of plausible prior attempts to solve the problem and/or related problems is drawn from _____.	a wide array of clearly-identified and consistently-credible sources	a variety of clearly-identified and consistently-credible sources	several—but not necessarily varied—clearly-identified and generally-credible sources	a limited number of sources, some of which may not be clearly	only one or two sources that may not be clearly identified and/or credible	missing or minimal (a single source that is not clearly identified and/or
