

Level of importance for requirements

1. Making sure that it does not damage the blinds by using a soft bungi cord that is 12 inches.
2. Making sure that it does not make any noise by keeping all 20 of the blinds fastened securely.
3. Making sure that it is not a distraction to the students by keeping a level 1 of noise.
4. Making sure that it is easy to adjust by having an adjusted time of under 10 seconds.
5. Making sure that it is easy to access for the teachers in a short amount of time.

The stakeholder Mr. Blanchard says that the list of importance for the requirements are the same ones that we have listed above, and these are the best options to make sure that this is the best way to achieve success with the design and solve the problem.
