

### Element C

**Design requirements are listed and prioritized, and they are consistently clear and detailed; these design requirements presented are consistently objective, measurable, and they would be highly likely to lead to a tangible and viable solution to the problem identified; there is evidence that requirements represent the needs of, and have been validated by, many if not all primary stakeholder groups.**

With the given details and aspects from our primary stakeholders and research, we determined the following criteria for the Beauty and the Beast magical mirror:

1. Mirror must be able to be held comfortably for a maximum of 20 seconds (includes weight)
  - a. By includes weight, the comfortability factor is also dependent on the weight, which we determined through testing, between 1 pound (0.5 kg) and no heavier than 5 pounds (2.25 kg).
2. Mirror must be able to sustain continuous motion for 1 whole minute.
3. Mirror must be able to illuminate for a duration of 30s to 1 min in a way that is visible from 25 meters / 85 feet away.
4. Mirror must resemble the mirror from the actual / animated Beauty and the Beast Movie.
5. Mechanical elements may not be seen on the mirror from 3 meters / 10 feet away.
6. Must be able to be controlled someone either on stage directly or off stage from a minimum of 9 meters / 30 feet away.
