

Each idea should include not only words, but also a picture. Use as many copies of this sub-template as needed.

Julian's Design Idea #1

Date:11/21/2024

Description: It's a clubhouse that is a greenhouse

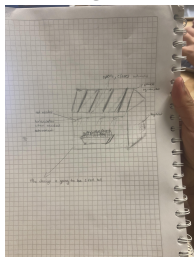

Drawing includes distinguishing information such as scale, dimensions, and materials: Wood, metal, iron, scope, door, plants, dirt, pots, trays, water, fertilizer, etc...

Martin's Design Idea #2 A small greenhouse with an automatic closing top

Date:11/21/2024

Description: A small greenhouse that has an automatic closing top to create shade to the plants. And could be powered by solar panels also can automatically spray water to the plants

Drawing that includes distinguishing information such as scale, dimensions, and materials:

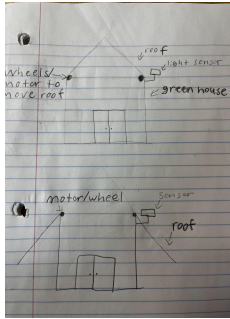

Jacobs Design Idea #3 An automatic closing top.

Date:11/21/24

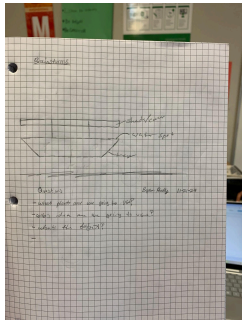

Description: A greenhouse that has an automatic closing top to shade the plants if too much light is coming in that could burn the plants. It would have a sensor that detects the amount of light coming in, tells a computer too much is coming and a motor will close the top.

Drawing that includes distinguishing information such as scale, dimensions, and materials:

Greenhouse, plants, glass, shaded roof, sensor, water, fertilizer, pots, trays, buckets.

Bryson's Design #4 This is a tray with a movable top for battery operative. On the tray(bottom) you put the plant, and from the side you can add the water whenever you need to.

	weight	Option 1	Option 2	Option 3	Option 4
Criterion A	20 - 25				
Criterion B	20 - 25				
Criterion C	20 - 25				
Criterion D	20 - 25				
Criterion E	20 - 25				
score					

Date: 12/10/24

Sketch: Bryson predator

Manufacturing Methods:

Step 1: Perfect the design

Step 2: Look for materials

Step 3: Create device

Supply List and Costs:

Item	Cost each	# needed	Total	
Wood	25 dollars	5 pieces	100	
foam	9 dollars	1 piece	9	
Battery, cables, motor	50 dollars	2 cables, 1 battery, and one motor	50 dollars for all	
Total Cost	160
