Element F: Consideration of Design Viability

Judgment about Design Viability (F1)

Design Viability Description	Connection to Design Requirement	Credible Evidence?
The moldless design will help the plants grow better.	The design must be moldless	Our design causes the water to flow out of the pipe, this will allow for the pipe to dry faster, preventing mold growth
An inexpensive design will allow for the design to be easily replaced if it is ever damaged.	The budget cannot exceed \$10	We created a table of costs for each component of the solution and found that the components that we need to complete our design does not surpass 10\$.
The design materials being easily accessible will speed up the time it takes to build as we won't have to wait for materials to arrive and will be able to	The design materials must be easily accessible.	We requested the desired materials from Ms. Rudnick to buy from home depot. The pvc pipes we need are also already available at

Stepan, Chloe, Haralambos, Sam

meet our deadlines.		school.
Creating a more durable design will ensure that it will last a long time.	The design must be durable	The product is made of pvc pipe, which is so durable it is often used for plumbing and aluminum which is very long lasting and resistant to all sorts of corrosion and weathering.
The gardening club is run by students for students, which means that the leaders need be able to easily understand how it works and be able to teach it to complete beginners	The design must be easy to use	Our design is very similar to the current solution so it will be easy for anyone who has used the current version to learn it and teach others.
