Element F: Consideration of Design Viability

Judgment about Design Viability (F1)

Design Viability Description	Connection to Design Requirement	Credible Evidence?
The solution is inexpensive	The design does not cost more than \$20	<i>(Cost breakdown table added below)</i>
The proposed solution is durable.	Clothes are frequently washed and the drawstring coming out mainly occurs during wash. The item must be waterproof.	The proposed idea is modeled based on the popular Croc Jibbitz, which is certified by Croc to be waterproof and durable. According to wikiHow, "Jibbitz are water-resistant and can withstand splashes and exposure to water."
The solution is safe.	The design seeks to solve a problem and must not cause any damage.	The solution is going to be Rubber, a stretchy and soft material that will not cut the wearer, tear the clothing, harm washers, or set off detectors.
The solution is quiet.	The design must not make irritating noise or bang against washers causing a nuisance.	The rubber material is sure to be below 1 decibel. In comparison, a rubber bullet is extremely silent while being fired at high power. Our solution is untouched

		and is guaranteed to be even less noisy.
--	--	--

Supply List and Costs:

- Croc gibbet (for 30 jibbitz about \$7)
- Velcro (cable catcher - \$2.87 each)
- Super glue (non meltable 0.110z - \$6.31)

Item	Cost each	# needed	Total
Croc jibbit	\$0.23	~20	\$6.99
Velcro	\$2.87	1	\$2.87
Super Glue	\$6.31	1	\$6.31
Total Cost			\$16.17
