

1 weight

Two things could have made this design not viable, the weight and FEW being redone. We talked to Ms. Bussey about how FEW was being redone and if this space would have been changed. She said that the space should remain the same so we don't have to worry about any dimension changes. The second thing that could make this art piece not workable is the weight. When we talked to Ms Bussey she said that the maximum weight is 15 lbs every time it connects to the ceiling. We are connecting it to the ceiling in 4 different areas so its max weight is 60 lbs. Each sheet of mirrored acrylic is 1 lb and we have 5 sheets. So the max weight would be 5 pounds of the acrylic (if we used all of it).
