

Testing Details (H1, H2, H3, H4)

	requirement	testing setup and procedure	test cases and number of trials	expected range of results	pass/fail criteria, goal
3	It cleans good	Run dirty water with the tablet in it and see if the water comes out clean.	Three times and run water through for 5 mins.	clean	Fail: product leaves some dirt in shower head, does not get all build up, water does not run right Pass: Water runs good and cleans majority of build-up Goal: Water flow is all straight and there is no build-up left
4	Its efficient	Run dirty water with the tablet in it and see if the water comes out clean.	Run water for 5 mins for three times.	Clean and runs smooth	Fail: does not run smoothly. Pass: runs smoothly and is clean in the end. Goal: To clear the water when it comes out.
5	Its durable	Make it run many times and see if it	Run for a couple	Does not break	Fail: breaks with

		still holds up after a while.	months and see how it is holding up and see if it still works.	easily	little force added Pass: Takes a strong force to break Goal: takes a strong outside force to break
6	Its cheap	Get all the materials all together and see what the end price is going to be and then see what different materials to make it cheaper.	Get cheap materials and see if it runs good and increase the quality of the material if cheap material is not working.	affordable	Fail: takes a lot of money to make/buy Pass: kind of costly but affordable for a normal person Goal: Very cheap for a person to buy anyday

Feedback From Field Experts

The small black doodle in the bottom was done by an expert at Duke. He thought of an alternate solution that was using a stationary shower head.

Some other feedback we got was to try and simplify our design by figuring out what specific contaminate we are targeting. Some experts suggested going for calcium because that is more common in hard water rather than mold. Others also told us to research possible harmless solutions instead of using chemicals, which we were already planning on doing. Speaking to them gave us many good ideas on how to think of our final solutions.
