Element C

Element C: Presentation and Justification of Solution Design Requirements

Compact Size #1 (HIGH Priority)

The marker holder must fit on the whiteboard ledge without sticking out more than 1 inch from the edge. It must not impede movement throughout the classroom or be easy to knock over.

This ties into researching possible compact organizer designs. Our design needs to be similar, prioritizing saving space while maximizing efficiency. Also, this ties into our visit to the site. We observed that the walking space in front of the whiteboard is a little tight, so the holder should be as compact as possible.

Storage Functionality #2 (HIGH Priority)

The marker holder must hold markers and one or more erasing devices.

Research showed that teachers use multiple markers and at least one eraser daily. The holder must store enough materials to reduce clutter. The marker holder must be able to hold several markers and at least one erasing device. Research showed that teachers regularly use multiple markers during lessons and usually keep an eraser nearby to quickly correct mistakes on the board. Because of this, the holder needs enough space to store these items in one place. This will help keep the teacher's desk or board area organized and reduce clutter, making it easier for teachers to quickly grab the materials they need while teaching.

Secure and Intuitive #3 (HIGH Priority)

Each holder needs to be secure and intuitively functional to be used.

Every classroom needs a compartment in order to be organized. Teachers need to have a class organizer for markers in order to not let markers be dry or misplaced. Teachers can also know how they can protect their personal belongings from the compartment.

Rubric

Element C: Presentation and Justification of Solution Design Requirements						
C1. Determination of design requirements. _____ design requirements are related to prior research.	score = 5 80%-100% of	score = 4 60%-79% of	score = 3 40%-59% of	score = 2 20%-39% of	score = 1 1%-19% of	score = 0 No
C2. Requirements list. Design requirements _____.	score = 5 are listed, prioritized, clear, and detailed	score = 4 are listed, prioritized, generally clear, and detailed	score = 3 are listed, prioritized, generally clear, and somewhat detailed	score = 2 are listed and prioritized but some or all may be incomplete and/or lack specificity	score = 1 are listed, formatted, and prioritization is attempted, but these may be partial or overly general	score = 0 are not present or are too vague
C3. Quantity of high-priority design requirements. _____ of the design requirements listed are identified as high priority.	score = 5 Five	score = 4 Four	score = 3 Three	score = 2 Two	score = 1 One	score = 0 None
C4. Objective & measurable. Design requirements _____.	score = 5 are consistently objective and measurable	score = 4 are nearly always objective and measurable	score = 3 are generally objective and measurable	score = 2 may be only sometimes objective and/or measurable	score = 1 are insufficiently measurable	score = 0 are not measurable
C5. Leading to solution. Design requirements	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
