Element C Initial Template

How to use this template

Element C: Presentation and Justification of Solution Design Requirements

Design Requirement #1 (HIGH Priority)

Requirement: The Organizer must store and charge a minimum of 3 chromebooks in individual labeled slots with built in cable management and prevent charger theft.

Prior Research: prior research on chromebook management devices showed that schools all over the county experience loss, theft, and damage in general because chromebooks aren't securely stored and organized and get handed out to students way too easily. Charging carts like LocknCharge mainly focus on security and organized charging, which show that to solve this problem security and cable management are really important to the overall design and goal.

Primary stakeholder: Mr.HS (Teacher).

Feedback:

Design Requirement #2 (HIGH Priority)

Must store auxiliary materials in an organized manner that allows easy access.

The primary purpose of an organizer is to organize materials, without the ability to do so the organizer is useless.

Share this design requirement with (a) primary stakeholder(s) to get their validation. Share any feedback, notes, and/or your revisions as evidence that you conducted primary stakeholder validation.

Name: _____

Date: _____

Class: _____

Design Requirement #3 (HIGH Priority)

Requirement: The total cost of materials should not exceed \$40.

Prior research: commercial charging carts usually cost over \$1000, which is not possible or practical for this problem that requires a single classroom solution. A lower cost design will make it more realistic and feasible.

Primary stakeholder: Mr. HS

Feedback:

Rubric

Element C: Presentation and Justification of Solution Design Requirements						
C1. Determination of design requirements. _____ design requirements are related to prior research.	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
	80%-100% of	60%-79% of	40%-59% of	20%-39% of	1%-19% of	No
C2. Requirements list. Design requirements _____.	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
	are listed, prioritized, clear, and detailed	are listed, prioritized, generally clear, and detailed	are listed, prioritized, generally clear, and somewhat detailed	are listed and prioritized but some or all may be incomplete and/or lack specificity	are listed, formatted, and prioritization is attempted, but these may be partial or overly general	are not present or are too vague
C3. Quantity of high-priority design requirements. _____ of the design requirements listed are	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
	Five	Four	Three	Two	One	None

Name: _____

Date: _____

Class: _____

identified as high priority.						
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
C4. Objective & measurable. Design requirements _____.	are consistently objective and measurable	are nearly always objective and measurable	are generally objective and measurable	may be only sometimes objective and/or measurable	are insufficiently measurable	are not measurable
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
C5. Leading to solution. Design requirements _____.	would be highly likely to lead to a tangible and viable problem solution	would be likely to lead to a tangible and viable problem solution	have a potential to lead to a tangible and viable problem solution	have some potential to lead to a tangible and viable problem solution	have little potential to lead to a tangible and viable problem solution	cannot lead to a tangible and viable problem solution
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
C6. Primary stakeholder validation. There is evidence that requirements represent the needs of, and have been validated by, _____ primary stakeholder groups.	80%-100% of	60%-79% of	40%-59% of	20%-39% of	1%-19% of	no primary stakeholder groups.
