

Element D

Anders Pyenson and Sam Tucker

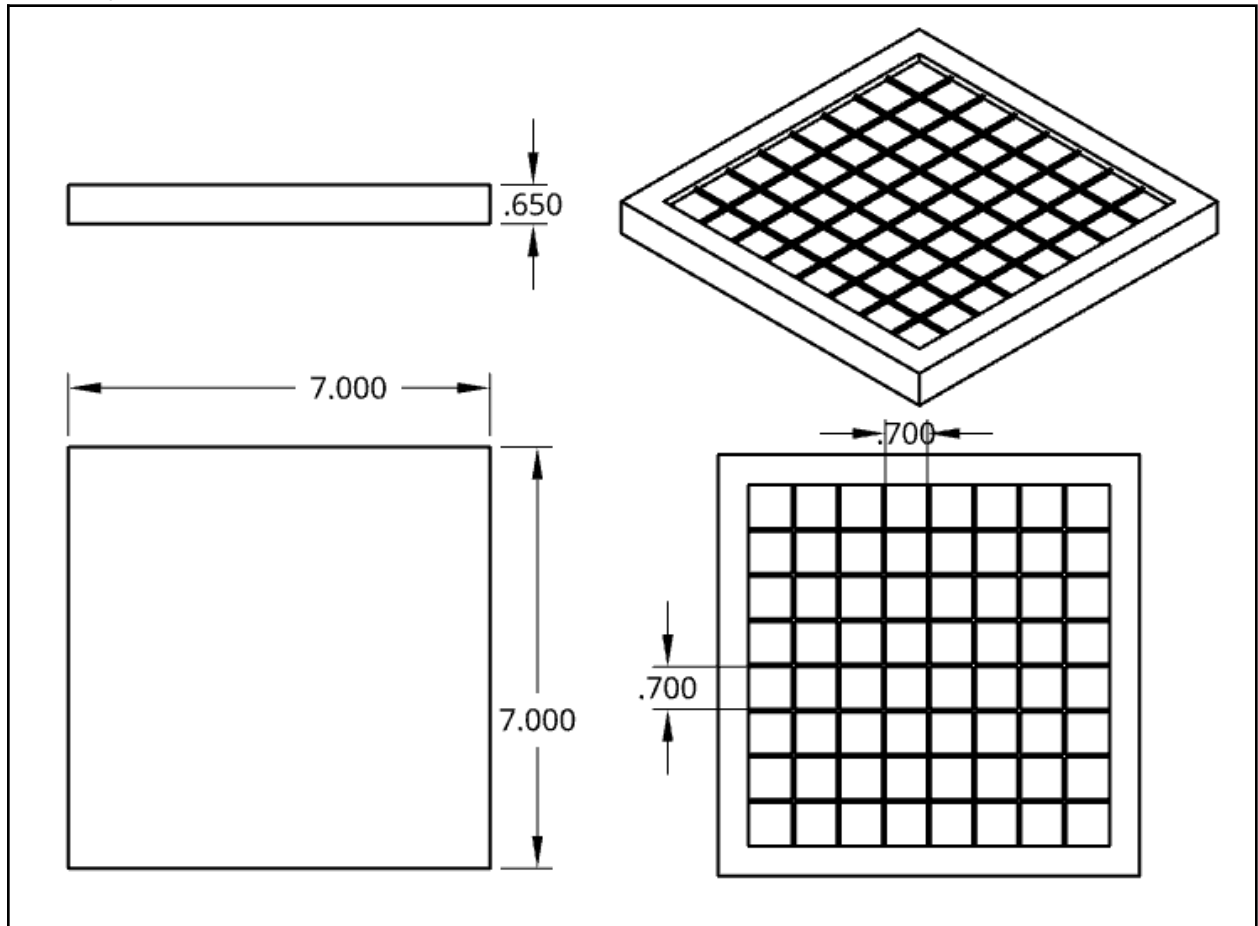

Initial Sketch

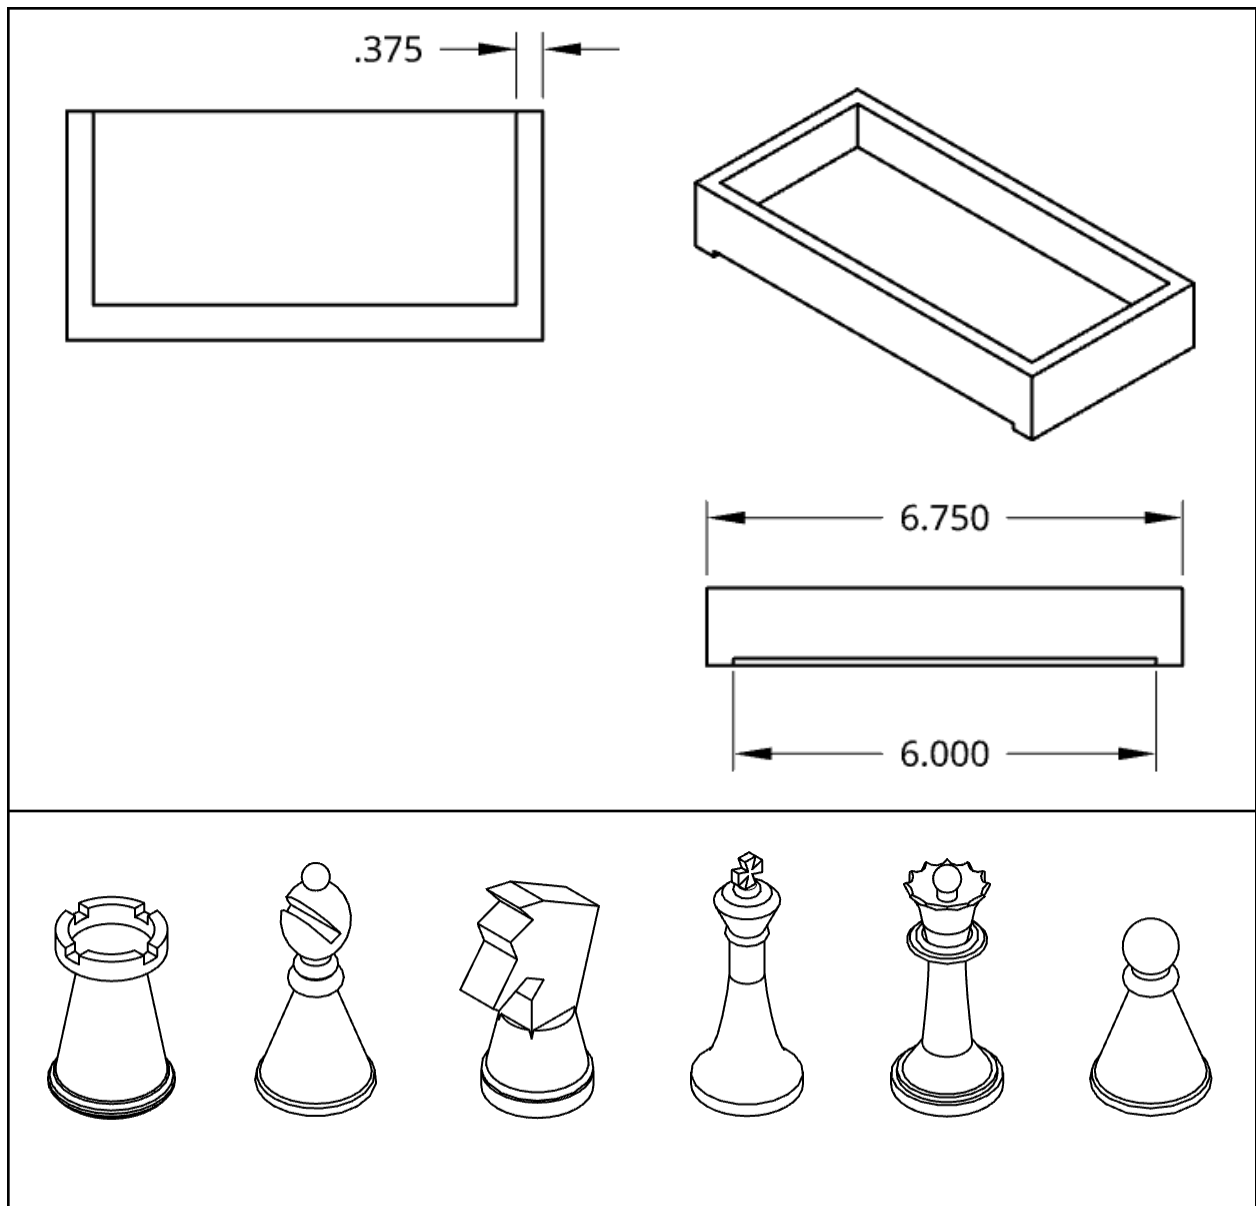

Design Solution Choice

Design	Portability	Quality	Ease of production	Total
Flat board	1	2	3	6
Folding board	3	1	1	5
Seperate container	2	3	2	7

Prototype Blueprints (all units in inches)

Plan of Action

Week 1	Week 2	Week 3	Week 4
Brainstorm ideas and analyze possibilities	Decide on a design and start production	Continue prototype design and testing	Show prototype to experts and receive feedback
Week 5	Week 6	Week 7	Week 8

Begin portfolio report (component I)	Continue portfolio (component II)	Continue portfolio (component III)	Finalize portfolio (component IV)
---	--------------------------------------	---------------------------------------	--------------------------------------

Important Information

Date	What Changed	Why was it changed	How will we improve
4-28-2026	We created the board and the pawns	We needed to create the prototype pieces and board	We will revisit these designs until we perfect them.
5-11-2026	Created the rook, bishop, queen, and changed the board design.	We wanted a different board design, and we needed more piece prototypes	We will continue to revisit designs
5-22-2026	We created one final board design, and made it physically. We also redesigned the queen and King pieces.	We needed a physical prototype, and needed realistic pieces	Re-design the knight head.
