Element D: Design Concept Generation, Analysis, and Selection

Design Idea Generation (D1)

Design Idea #1

Date: 2/18/26

Description: This rabbit home is a chew safe and durable wooden hutch designed for easy transport. Built from untreated kiln dried pine with corner guards to increase safety, it protects against chewing. Two rear wheels and a front handle allow it to tilt and roll like luggage.

Design Idea #2

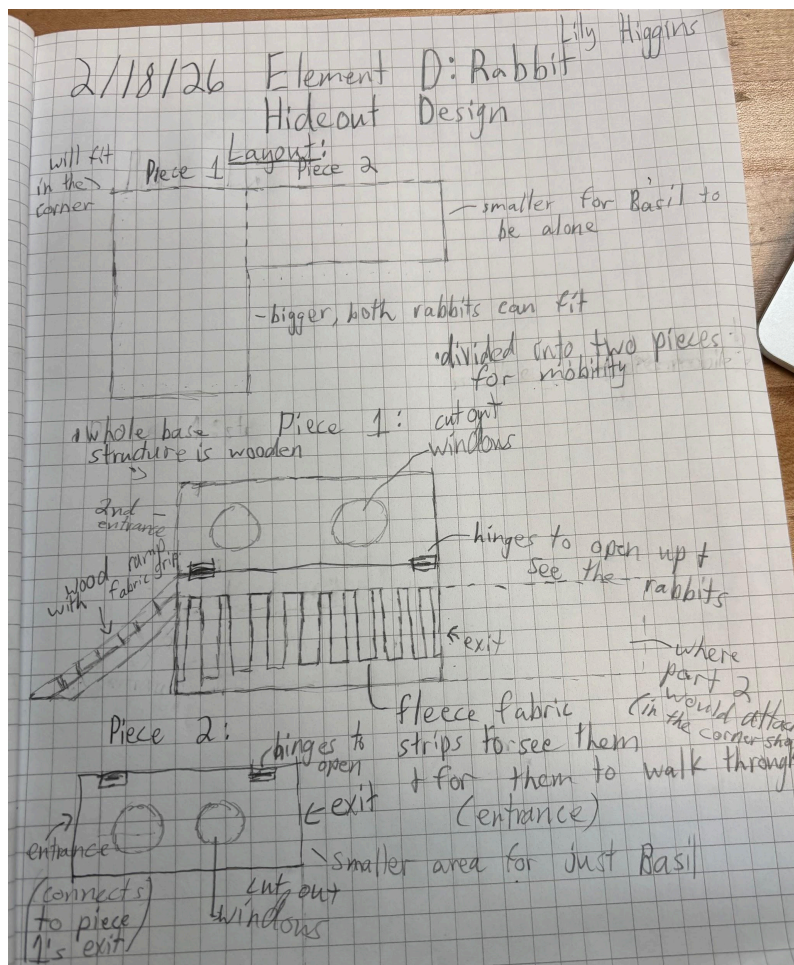

Name: _____

Date: _____

Class: _____

Date: 2/18/26

Description: This is a rabbit hideout with 2 separate pieces for mobility, safe materials, windows and fleece strips for visibility, hinges to open the walls and access the rabbits, a separate smaller area for Basil, and a ramp area to climb up to for more variety. It has many entrances and exits for easy access and escape from each other if needed, and fits into the corner of the cage nicely.

Design Idea #3

MyDesign Portfolio - Element D Initial Template

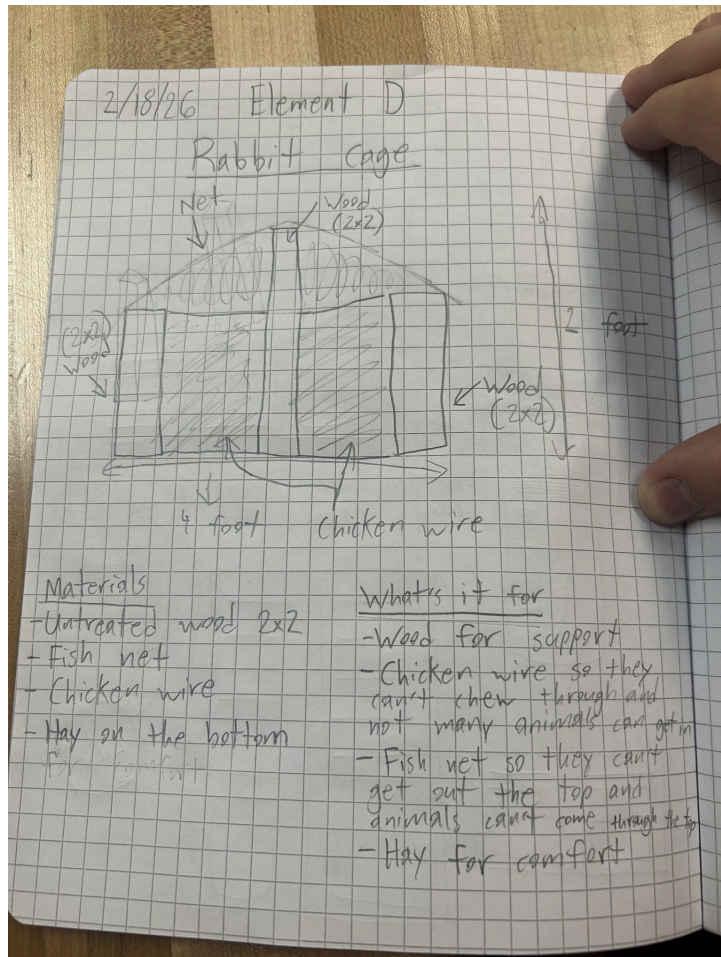

Name: _____

Date: _____

Class: _____

Date: 2/20/26

Description: This is a rabbit cage that focuses mainly on safety which includes non-toxic materials and it is secure so animals can't get to the rabbits easily. It is made out of untreated wood for support and there is chicken wire on the sides so the rabbits can't get out easily and other animals can't get in easily. The fish net that is on top of the cage is so birds and other animals that can climb can't get in. There will also be hay on the bottom of the cage so the rabbits are comfortable and a hamster wheel so they will have entertainment.

Design Idea #4

Date: 2/25/26

Description: This is a rabbit hideout with 2 separate pieces connected by a tunnel. For mobility, safe materials, windows and chicken wire for visibility, hinges to open the walls and easy access to rabbits, and 2 ramp areas to climb up to for more access. It has many entrances and exits for easy access and escape from each other if needed, and fits into the corner of the room or anywhere else easily.

Design Idea Comparison and Selection (D1, D2)

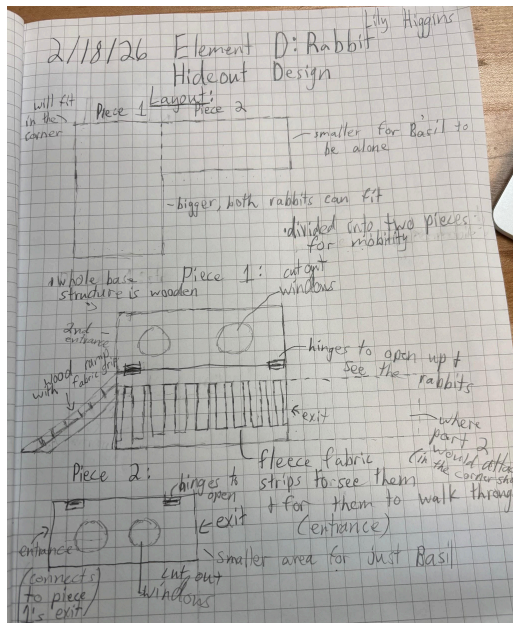

We all voted on each design and option number 2 won with the most votes.

Design Blueprint (D4)

Design Blueprint #1

Date: 3/11/26

Sketch:

Manufacturing Methods:

Step 1: We would cut out windows and the doors in the wood and then form the cage.

MyDesign Portfolio - Element D Initial Template

Name: _____

Date: _____

Class: _____

Step 2: We would then cut out the fleece fabric and place it in the door ways in the cage.

Step 3: Finally we would add the ramp and place the chicken wire in the windows.

Supply List and Costs:

Item	Cost each	# needed	Total
Untreated Pine Wood	\$8 per 2x2 \$3 per plank	4 2x2's 12 planks	\$32 for 2x2 \$36 for planks
Fleece Fabric	\$8	1 five foot sheet of fabric	\$8
Chicken Wire	12\$	1 roll	\$12
Total Cost	\$31	18	\$88

Plan of Action (D3)

A Gantt chart is encouraged to lay out the primary steps expected on a visual timeline. Larger tasks from the Gantt chart should be broken down further into detailed sub-tasks, which may be housed in a different day-to-day document. Discrete tasks should include enough detail such that others could replicate the efforts, such as procedures, materials, tools, status, etc.
