

1. The chickens need water because it is a main source of life and provides a sustainable solution. Moreover, it will help the people responsible for her by providing them with water. The chickens do not have an easy way to refill their water since the closet pump is by the manor house.
2. While we came up with a list of problems when we were brainstorming, the main issue after meeting with ms. Shao is that water is the number one concern. And the distance from the pump should be reduced
3. Our stakeholders are Mrs. Shao, maintenance, and Mrs. Harrison. The people who might also be interested in our issue are the chicken club and people who live on campus and eat their eggs.
4. Our primary stakeholders are the chickens for whom the water will be provided.
5. https://www.google.com/search?q=how+do+you+move+water+up+a+hill&rlz=1C1RXQR_enUS977US977&oq=how+do+you+move+water+up+a+&gs_lcrp=EgZjaHJvbWUqBwgBECEYoAEyBggAEEUYOTIHCAEQIRigATIHCAIQIRigATIHCAQIRirAjiHCAQQIRirAjiKCAUQIRgWGB0YHjIKCAYQIRgWGB0YHjIKCAcQIRgWGB0YHjIKCAgQIRgWGB0YHjIKCAkQIRgWGB0YHtlBCTEyMzc3ajFqN6gCALACAA&sourceid=chrome&ie=UTF-8&safe=active&ssui=on
 Yes, this really needs to be solved so that the chickens do not go without water as well as making it easier and more accessible for the people having to bring them water.
6. This problem needs to be solved before summer due to the increased heat. Chickens need water and we wanted to decrease the time of labor of the chicken chaperones by giving them a more sustainable water source.
