

Shower project

Team OH-J

Element A: Presentation and Justification of the problem

In the boys dorms the dorm residents need a place to put their toiletries because there is not a built-in shelf in the communal showers and setting things on the floor is unsanitary. Solving the problem can help the dorm students place their toiletries somewhere without having to set it down on the ground. The problem is that there is nowhere to hang your shampoo and that leads to people putting it on the ground.

The cleaning crew, the dorm residents, and the faculty who are involved with the dorm are the primary stakeholders. Other people who would be interested in our solution are people who are thinking about living in the dorms, the parents of the dorm residents, and other members of faculty. The people who are thinking about living in the dorms would care because it would mean that if they do board then their life will be easier than current boarding students. The parents of the boarding students would care because it means that they would not have to buy a caddy. Then other faculty would just care about the wellbeing of their students because they are good people.

This problem needs to be solved because it is unsanitary to have your things on the floor. Also it is nice to have a better dorm experience and no one would not want to have a better dorm experience. It is important to solve this problem now because if we do not then it will stay a problem and if it is not done now then it may never get done.
