Element A Initial Template

Element A: Presentation and Justification of the Problem

Problem Statement and Details (A1, A2, A5)

The problem will address the problem of the strings of the hoodie or pants getting lost in the hoodie or falling out into the washing and drying machines because it is annoying to get the string back out or wear a hoodie without strings. Most hoodies have strings that have knots at the end to stop it from falling out or getting lost. Normally, to get the string back out, people take the entire thing out and then use a safety pin to string it back together. Some other people who might benefit from our solution include doctors or dentists who want to keep a suction tube next to them or on them at all times and not fall through the hole and people who crochet and want the string to not go loose while they take a break. Some unintended consequences that would arise include the material melting while in the dryer or washing machine or the device breaks down while in the machines. The main people impacted by this problem are students, athletes, and laundromats.

This problem needs to be solved because there are currently no solutions to solving the problem and people are annoyed that it keeps happening.

Stakeholder Concerns and Connections (A3, A4)

- Students - takes too long to get the string back out once it is lost, and happens all the time
- Athletes - ends up taking the entire string out when there is not time and the pants keep slipping
- Laundromats - the string sometimes gets stuck and does not wash and dry completely, leading to the hoodie or pants ending up to have a wet smell

Name: _____

Date: _____

Class: _____

- Parents - it is hard to help a child when their string is lost like that, very annoying

Concerns of Stakeholders:

- String getting lost
- Takes too much time to put the string back in
- Knots do not look nice

Secondary Stakeholders:

- Laundry machine (parents)

Solution might or might not have an impact on the machine

Problem Importance (A6)

Everyone wears hoodies and track pants. Most people know that the strings are used to tighten the pants so that pants do not immediately fall off when running or walking. But then when it comes to the dryer, suddenly one side gets lost inside the hem and there is no way to get it out easily. In the 21st century, there should be a nice solution to that so we do not waste our time sitting and trying to pick the string out using a crochet hook or a pin. Its annoying every single time I see that the string is lost in the hoodie again to solve it I normally use a straw to string it back through like shown in this video (How to Fix Your Hoodie's Drawstring (The Easy Way) #shorts). The video shows the only solution to fix the problem now and it takes a long time to do this. Cosmopolitan also mentions how "one side is hanging longer? Yup, not cute" and "It is a tedious process where we use a safety pin and a pen" (Cosmopolitan).

Element A: Presentation and Justification of the Problem						
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
A1. Problem identification is _____.	very clear and objective	clear and objective	somewhat clear and objective	somewhat clear or objective	unclear	missing (cannot be inferred from
