

Notes:

1. Spring art show needs a piece of moving art for human entertainment and a compliment for the space.
2. Students, faculty, and parents are the main audience of this art show. They go to observe the Garrison Forest artwork. While these participants are analyzing the works, they are rarely allowed to interact with it. Our piece will be an engaging work of art that will be different from all others. This addition of kinetic art will enhance the interest and entertainment of the whole show. This will occur in the spring of 2024.

After talking to the primary stakeholder we have decided to switch the location to MO lobby. The problem is now that there is no art work. It will be in the staircase and available for students to interact with.

We are now designing the piece for the staircase of FEW. After conversations with Ms. Bussey decided our design would fit better here. With the large window behind it, the mirrors will now be able to reflect light. The height of the installation will also avoid students touching them and breaking.

3. By adding a different style of art. more people will be attracted to engage with the show and even the other works. This could also positively impact prospective students' experiences when touring the art building. One potential unintended consequence is people interacting with artwork that is only meant to be observed. This should be avoided by designing a sign that specifies which pieces can be touched.
4. Our primary stakeholder is Ms. Seltzer. Others who are interested in this project are Mr. Beam, Ms. Sarah, and Mr. Vogel. Ms. Seltzer and Ms. Sarah are interested in the visual appeal of this piece while Mr. Vogel and Mr. Bean are concerned with the motion elements.

Additionally our stakeholder will be Mrs. Bussey. She has approved of the Idea in the lobby.

5.

- Why is art important.

6. Art will enhance views, creative minds and encourage abstract thinking.
((Ioannidou, 2023) Being surrounded by art has also been proven to improve someone's productivity. (Ioannidou, 2023) It has also been proven to better an individual's mental health. (Eduardo Kobra, Why is art important to society)
