Element B Initial Template

How to use this template

Students: The template below is one way to structure your research findings around past and current attempts to solve the problem, but the specific assignment given by your instructor may require a different structure or dictate different details. *If you make a copy of this template to edit for your research into prior design attempts, be sure to delete the instructions.*

Element B: Documentation and Analysis of Prior Design Attempts

Prior Design Attempt #1 - <insert name of prior design attempt #1>

Source

Albert Einstein High School, Mr Kapombe's Class

Image

Details

Include main details about this prior design attempt

Name: _____

Date: _____

Class: _____

Analysis: The good aspects of this door stop is it has a grippy surface to grip the door but one drawback is that it is pretty small and could slide on the floor

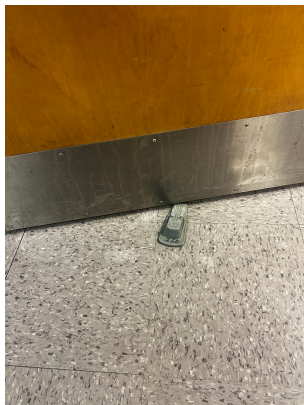

Provide evidence and explain what parts of this prior design attempt were unsuccessful at solving the defined problem and why based on design requirements.

Prior Design Attempt #2 - <insert name of prior design attempt #2>

Source

Mr. Lerner's class

Image

Details

Include main details about this prior design attempt

Analysis: This door stop does a good job at stopping the door But it is very small and is made out of a rubber material that has worn away over time.

Prior Design Attempt #3 - <insert name of prior design attempt #3>

Source

Room across from 204

Image

Name: _____

Date: _____

Class: _____

*Details**Works well*

Analysis: This door stop is the perfect size and is made out of grippy rubber which stops the door for moving.

Provide evidence and explain what parts of this prior design attempt were unsuccessful at solving the defined problem and why based on design requirements.

Prior Design Attempt #4 - <insert name of prior design attempt #4>

*Source**Upstairs bathroom at Einstein**Imagel'hn ., /**Details*

It works well for the bathrooms

Name: _____

Date: _____

Class: _____

Analysis: This door stop is a solid wood door stop but some of the drawbacks is it has no grippiness and is a smooth surface so could slip out of the door.

There was no clear stopping point because it's wood and it starts to slide.

Prior Design Attempt #5 - <insert name of prior design attempt #5>

Source

Etsy site

Image

Details:

The materials used was 3D filament

Analysis: This door stop did a good job stopping the door and has a cool design to it

Some of the reviews stated that it was not very durable and that it need more support.

Rubric

Element B: Documentation and Analysis of Prior Design Attempts						
B1. Documentation of plausible prior attempts to solve the problem and/or related problems is drawn from _____.	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
	a wide array of clearly-identified and consistently-credible	a variety of clearly-identified and consistently-credible sources	several—but not necessarily varied—clearly-identified and	a limited number of sources, some of which may not be	only one or two sources that may not be clearly identified and/or	missing or minimal (a single source that is not clearly identified

Name: _____

Date: _____

Class: _____

	sources		generally-credible sources	clearly identified and/or credible	credible	and/or credible)
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
B2. The analysis of past and current attempts to solve the problem — including both strengths and shortcomings — _____.	is consistently clear, detailed, and supported by relevant data	is clear, generally detailed, and supported by relevant data	is generally clear and contains some detail and relevant supporting data	is overly general and contains little detail and/or relevant supporting data	is vague and is missing any relevant details and/or relevant supporting data	cannot be inferred from information intended as analysis of past and/or current attempts to solve the problem
