

MyDesign Portfolio

Element J Initial Template

How to use this template

Students: If you make a copy of this template to edit for your own record of expert evaluation, be sure to delete the instructions.

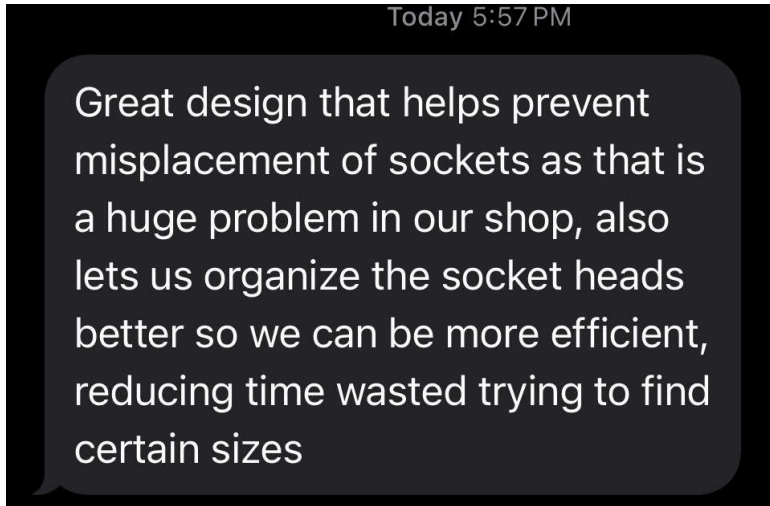

In order to earn a 5 on this element, you will need to collect project evaluation from 3 or more stakeholders and 3 or more demonstrably-qualified field experts. Project evaluation includes providing feedback on the prototype, reviewing the testing results, providing feedback on the analysis of the testing results, and providing recommendations for improvement. Project evaluation should address 2 or more aspects of your design or engineering design process. Duplicate the evaluator template as needed if you have more evaluators than are listed in the template below.

Element J: Documentation of Evaluation

Stakeholder Evaluation #1

- Name of evaluator: Antonio Ghaleb
- Justification for how this evaluator is a stakeholder: our original stakeholder, owns/works at wolf trap garage.

- Documentation of the project evaluation, which could include copies of emails, transcripts of conversations, filled out feedback forms, etc.

Stakeholder Evaluation #2

- Name of evaluator: Ryan
- Justification for how this evaluator is a stakeholder: Works at porsche of tysons
- Documentation of the project evaluation, which could include copies of emails, transcripts of conversations, filled out feedback forms, etc.

This socket holder is well-designed and versatile! It securely holds 10 sockets of various sizes, works both on a pegboard and standalone, and allows easy removal while maintaining a tight fit.

Stakeholder Evaluation #3

- Name of evaluator: berk
- Justification for how this evaluator is a stakeholder: works at wolfttrap garage with antonio

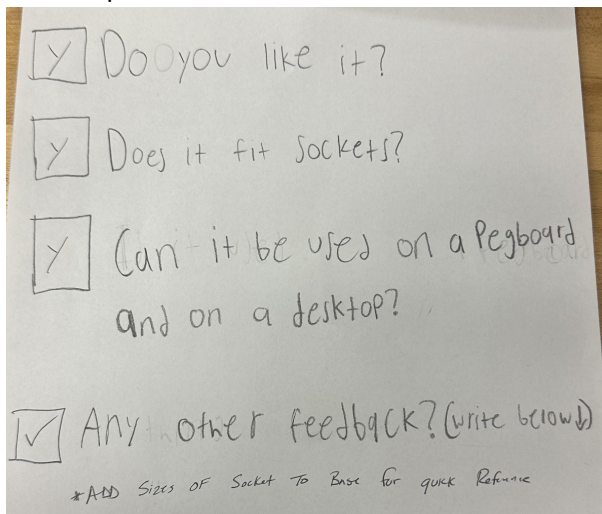

- Documentation of the project evaluation, which could include copies of emails, transcripts of conversations, filled out feedback forms, etc.

Berk

It's a very clean design and something simple to keep your tools organized. it would be really cool to have this at a mechanic shop since tools can get messy and disorganized in the drawer from rolling around.

Field Expert Evaluation #1

- Name of evaluator: Mr. Reed
- Justification for how this evaluator is a demonstrably-qualified field expert (professionals who spend at least a portion of their time working in a field directly related to your project): teacher at marshall highschoools automotive technology class
- Documentation of the project evaluation, which could include copies of emails, transcripts of conversations, filled out feedback forms, etc.

☒ Do you like it?

☒ Does it fit sockets?

☒ Can it be used on a pegboard and on a desktop?

☒ Any other feedback? (write below)

*Add Sizes of Socket To Box for quick Reference

Field Expert Evaluation #2

- Name of evaluator: Reno

- Justification for how this evaluator is a demonstrably-qualified field expert (professionals who spend at least a portion of their time working in a field directly related to your project): owner/works at revtech performance.
- Documentation of the project evaluation, which could include copies of emails, transcripts of conversations, filled out feedback forms, etc.

"The design is great and would fit well in the shop, one thing to improve could be holding the sockets vertically as opposed to having them at an angle, this would minimize the space that it takes up in the shop."

Field Expert Evaluation #3

- Name of evaluator: Alireza
- Justification for how this evaluator is a demonstrably-qualified field expert (professionals who spend at least a portion of their time working in a field directly related to your project):

Alireza

I'd say: it's a great product that I would invest money into as a stockholder. The product is unique and useful.

- Documentation of the project evaluation, which could include copies of emails, transcripts of conversations, filled out feedback forms, etc.

Synthesis of the Project External Evaluation

Summarize all of the evaluators' comments in a way that highlights meaningful trends with specifics mentioned. Answer the questions, "What does the external evaluation mean?" and "What are you taking away from the external evaluation?"

Everyone found the socket holder to be well-designed, versatile, and practical for organizing sockets while preventing them from getting lost. It works well on a pegboard or as a standalone holder, with easy access and a secure fit. Suggestions included holding sockets vertically to save space, and adding labels to show the sockets size. Overall people thought it would be very useful in mechanic shops.

External evaluation provides feedback from people outside your team, giving you a fresh, unbiased perspective on your product. This helps validate your work, highlights areas to improve, and ensures your product truly meets users' needs.
