

Element J: Documentation of Evaluation

Stakeholders Involved:

- Ned Vorhees – Marine Engineering Expert (MATE Judge)
- Ms. Crenshaw – School Engineering Mentor
- Jacob M. – CAD Engineer on team

Feedback included:

- Polystyrene over pool noodles (more lift, better profile)
- Tether buoyancy must match cable weight
- Replace drain wires with braided shield for easier waterproofing

We recorded written feedback and verbal interviews, summarized, and used them to guide redesign choices.
