

Element J

Stakeholder Evaluation #1

- In summary of stakeholder number 1, the stakeholders liked that our project was fully functional and they could see how everything worked

Stakeholder Evaluation #2

In summary of stakeholder number 2, the stakeholders liked that our project had the ability to be fully programmable and no need for human interaction throughout the day

Stakeholder Evaluation #3

- In summary of stakeholder number 3, the stakeholders liked the use of hinges for the movable roof

Field Expert Evaluation #1

- In summary of Field Experts #1 is that we had a good idea and everybody had a role in this project. We had a good design with the roof. But we didn't have any programming.

Field Expert Evaluation #2

- In summary of Field Expert #2 is that we had a good idea and a good presentation of it. They liked the idea of the hinges to lift up the roof. But we didn't have any programming.

Field Expert Evaluation #3

- Experts#3 is that we did a good job, a good process and they liked the way we solved our problems

Summary:

What most of the experts told us to do is to develop the ideas that we have because they were good like the roof and the technology
