

Element J: Documentation of Evaluation

Stakeholder Evaluation #1

Name of evaluator: Mr. Roberson

Justification for how this evaluator is a stakeholder: Mr. Roberson is a stakeholder because he gives us ideas on how we should improve our prototype and lists his concerns with the tracker

Conversation: In the conversation with Mr. Roberson, he expressed that our original aspect of the project was too big. He expressed that a simple hidden tracker would be better than a whole set up of a world wide kidnapping issue.

Stakeholder Evaluation #2

Name of evaluator: Joel Simmons

Justification for how this evaluator is a stakeholder: (joel simmons) is a stakeholder because he provided information on how we should go about making the tracker and what they think is the best way to go about it considering that they are the one that would be operating the tracker.

Do you think that Kidnaping can be solved by a form of technology? * ☐ Yes ☐ No ☒ To some extent Add individual feedback	Who would you be comfortable with having access to your kids location if they are using the device. (Select all that apply) * ☒ Police ☒ 911 Operators ☐ CPS ☒ Hospital/Medical Workers ☐ Parent(s)/guardian (you) Add individual feedback	Should the device notify me before alerting authorities? * ☐ Yes ☒ No ☐ Other: _____ Add individual feedback
Do you think using a device that tracks your child, allows them to contact authorities, is * hidden within a piece of clothing that is not recognizable, and that the parent/guardians would have access to? ☐ Yes ☐ Possibly, with more thought ☒ Maybe ☐ Not really ☐ No Add individual feedback	Should the child need to activate the device for self-tracking manually, or is it actively track constantly? * ☐ Child activation ☐ Active Tracking ☒ Other: manually. This is not a yes or no question. Add individual feedback	If this device is released, what would be a reasonable price range? * ☐ \$20-40 ☐ \$40-60 ☒ \$60-80 ☐ \$80-100 ☐ Other: _____ Add individual feedback
Are there any suggestions for our project or anything else you think we should consider? * _____		

Stakeholder Evaluation #3

Name of evaluator: Meredith Huffaker

Justification for how this evaluator is a stakeholder: (Meredith Huffaker) is a stakeholder because she gave ideas on what this tracker should be designed to do and what we should do so it would be something she would use.

Do you think that Kidnaping can be solved by a form of technology? *

0

☐ Yes

☐ No

☒ To some extent

Add individual feedback

Do you think using a device that tracks your child, allows them to contact authorities, is hidden within a piece of clothing that is not recognizable, and that the parent/guardians would have access to? *

If this device is released, what would be a reasonable price range? *

0

☐ \$20-40

☐ \$40-60

☐ \$60-80

☒ \$80-100

☐ Other:

Add individual feedback

Are there any suggestions for our project or anything else you think we should consider? *

0

What type of clothing would the child consistently wear that the device be hidden in or would you be responsible for moving it every time they put on a new piece of clothing

Add individual feedback

Who would you be comfortable with having access to your kids location if they are using the device. (Select all that apply) *

0

☒ Police

☐ 911 Operators

☐ GPS

☐ Hospital/Medical Workers

☒ Parent(s)/guardian (you)

Add individual feedback

Should the child need to activate the device for self-tracking manually, or is it actively track constantly? *

0

☐ Child activation

☒ Active Tracking

☐ Other:

Add individual feedback

Field Expert Evaluation #1

Name of evaluator: Officer O'Bryant

Justification for how this evaluator is a demonstrably-qualified field expert: Officer O'Bryant is an expert because he is a police that knows lots about kidnappings and missing persons. He helped us determine what the tracker should be used for and its importance. He also recommended many ideas on how we should improve the tracker and we did so.

Conversation: He suggested that we changed our focus from a worldwide problem to a minimal tracker that would be hidden. He gave us insights on what the data was for kidnapping and missing persons and that's when we changed our focus from a big communicating tracker to a minimalistic hidden tracker for all ages.

Field Expert Evaluation #2

Name of evaluator: Mr. Roberson

Justification for how this evaluator is a demonstrably-qualified field expert: Mr. Roberson is an evaluator because he has experience with mother boards and certain websites. He helped us by giving us some tips of where and how to put the tracker on the body. He also helped with getting certain things like a watch and tracker.

Conversation: He gave us advice on how to design the tracker and what would be the best approach for going about it.

Summary: All of the evaluators and stakeholders made suggestions and gave advice on how we can improve our tracker and what would be the best way to do it. All the advice that was given was very helpful and we tried to incorporate all the suggestions that were given.
