

Fruit Fly

Cheesecake

Element J: Documentation of Evaluation

Our expert Mr. K is qualified because he lives in the dorm but he is also an engineering teacher. Mr. S is qualified because he also lives in the dorms, and another expert Dr. H is also qualified. She is qualified because she used to teach biology but she also knows a lot about insects and animals which can help us out. The stakeholder "S" is qualified because he lives in the dorms and has to deal with fruit flies so we can get his opinion on how to get rid of the fruit flies. The stakeholder "E" is qualified because he lives in a dorm that also has fruit flies so getting his opinion can also help. "J" is another qualified person because he is also roommates with the other stakeholders and is going to help get a solution on how to fix the problem.

The experts said that our prototype was a good idea and we could have made it smaller and not so big. The fruit fly trap could also have some color and not just be the color white, or we could substitute the funnel for something else and make our design better. The color of the fruit fly trap can be changed to a color that appeases people more. We can also get a new type of filament for the 3D printers and change it to waterproof. Our stakeholders also gave us some input on what they would like to see added to the design. One of the stakeholders said that they would like to see a handle added so that when you go to move it you do not accidentally drop it. The other stakeholder said that he would also like it to be not a lot of maintenance.

The feedback that we got from our experts and stakeholders impacted our design because we changed our prototype a couple of times until we found a design that would work with the design requirements. It also impacted it because when one of our stakeholders said that they

wanted low maintenance we changed our design to make it fit his needs. We have some questions about the funnel and how many flies are going to be able to stay inside before the hole is blocked. We made sure to add features to our design that would go along with the questions.
