MyDesign Portfolio

Element C Initial Template - AT - 18 points

The requirements from Element C will be used for Elements D, E, F, and H.

Element C: Presentation and Justification of Solution Design Requirements

Design Requirement #1 (HIGH Priority)

The program must be able to correctly guide users to over 90% of classrooms from the Bulldog Lobby.

This directly ties to prior research because we want people to easily find their desired room from one starting point.

The design requirement was approved by the stakeholder.

Design Requirement #2 (HIGH Priority)

The program must run on school computers using MATLAB without needing extra downloads.

This directly ties to prior research because the school already uses MATLAB in engineering classes.

The design requirement was approved by the stakeholder.

Name: _____

Date: _____

Class: _____

Design Requirement #3 (HIGH Priority)

The program must include both the first and second floors of the building.

This directly ties to prior research because the school building has two main levels with different room numbers.

The design requirement was approved by the stakeholder.

Design Requirement #4 (LOW Priority)

The program should work with Wi-Fi or internet connection.

This directly ties to prior research because the school has spotty Wi-Fi and/or internet in some parts of the building.

The design requirement was approved by the stakeholder.

Design Requirement #5 (LOW Priority)

The program should have a simple menu or button interface.

This directly ties to prior research because it will allow people to easily use the program.

Name: _____

Date: _____

Class: _____

The design requirement was approved by the stakeholder.

Rubric

Element C: Presentation and Justification of Solution Design Requirements						
C1. Determination of design requirements. _____ design requirements are related to prior research.	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
	80%-100% of	60%-79% of	40%-59% of	20%-39% of	1%-19% of	No
C2. Requirements list. Design requirements _____.	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
	are listed, prioritized, clear, and detailed	are listed, prioritized, generally clear, and detailed	are listed, prioritized, generally clear, and somewhat detailed	are listed and prioritized, but some or all may be incomplete and/or lack specificity	are listed, formatted, and prioritization is attempted, but these may be partial or overly general	are not present or are too vague
C3. Quantity of high-priority design requirements. _____ of the design requirements listed are identified as high priority.	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
	Five	Four	Three	Two	One	None
C4. Objective & measurable. Design requirements _____.	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
	are consistently objective and measurable	are nearly always objective and measurable	are generally objective and measurable	may be only sometimes objective and/or measurable	are insufficiently measurable	are not measurable

Name: _____

Date: _____

Class: _____

	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
C5. Leading to solution. Design requirements _____.	would be highly likely to lead to a tangible and viable problem solution	would be likely to lead to a tangible and viable problem solution	has the potential to lead to a tangible and viable problem solution	has some potential to lead to a tangible and viable problem solution	have little potential to lead to a tangible and viable problem solution	cannot lead to a tangible and viable problem solution
C6. Primary stakeholder validation. There is evidence that requirements represent the needs of, and have been validated by, _____ primary stakeholder groups.	80%-100% of	60%-79% of	40%-59% of	20%-39% of	1%-19% of	no primary stakeholder groups.
