MyDesign Portfolio

Element C Initial Template

Element C: Presentation and Justification of Solution Design Requirements

Design Requirement #1 (HIGH Priority)

The design must be extremely stable and strong, being able to hold multiple heavy guitars without fail. This design requirement ties to our research because to find effective storage for the guitars, the storage must be strong enough to hold these guitars otherwise it would all be in vain if a weak storage design were to break under the weight of the guitars.

Design Requirement #2 (HIGH Priority)

The design must be portable so it can be moved around the room with ease. This design requirement ties to our research because effective storage must also be able to easily be moved around as in the future, it would be a major problem to move the storage, thus making it ineffective as it would cause more problems with space.

Design Requirement #3 (HIGH Priority)

The design must be cheap. Due to our low funds, we must ensure that our design can be made using resources that are accessible and would not be too expensive. The idea is that almost everyone can make our design, and isn't limited to people with a good amount of money.

Design Requirement #4 (HIGH Priority)

The design should last for a long time. Due to the nature of the problem, the stakeholders said that the solution should last for as long as possible. This ties to our research because we would have to find some materials that can last for a while without degrading, thus making the design very effective and long lasting.

Design Requirement #5 (HIGH Priority)

Design Requirement #6 (LOW Priority)

Design Requirement #7 (LOW Priority)

Rubric

Element C: Presentation and Justification of Solution Design Requirements						
C1. Determination of design requirements. _____ design requirements are related to prior research.	score = 5 80%-100% of	score = 4 60%-79% of	score = 3 40%-59% of	score = 2 20%-39% of	score = 1 1%-19% of	score = 0 No
C2. Requirements list. Design requirements _____.	score = 5 are listed, prioritized, clear, and detailed	score = 4 are listed, prioritized, generally clear, and detailed	score = 3 are listed, prioritized, generally clear, and somewhat detailed	score = 2 are listed and prioritized but some or all may be incomplete and/or lack specificity	score = 1 are listed, formatted, and prioritization is attempted, but these may be partial or overly general	score = 0 are not present or are too vague
C3. Quantity of high-priority design requirements. _____ of the design requirements listed are identified as high priority.	score = 5 Five	score = 4 Four	score = 3 Three	score = 2 Two	score = 1 One	score = 0 None

Name: _____

Date: _____

Class: _____

	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
C4. Objective & measurable. Design requirements _____.	are consistently objective and measurable	are nearly always objective and measurable	are generally objective and measurable	may be only sometimes objective and/or measurable	are insufficiently measurable	are not measurable
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
C5. Leading to solution. Design requirements _____.	would be highly likely to lead to a tangible and viable problem solution	would be likely to lead to a tangible and viable problem solution	have a potential to lead to a tangible and viable problem solution	have some potential to lead to a tangible and viable problem solution	have little potential to lead to a tangible and viable problem solution	cannot lead to a tangible and viable problem solution
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
C6. Primary stakeholder validation. There is evidence that requirements represent the needs of, and have been validated by, _____ primary stakeholder groups.	80%-100% of	60%-79% of	40%-59% of	20%-39% of	1%-19% of	no primary stakeholder groups.
