Step 5: Cutting mesh to size. Depends more on measurements specific to your rov, we had 2 1' x 6 in 5mm mesh rectangles, a 9" x 1' 1mm rectangle, and 2 isosceles 5mm triangles with a base of 9" and height of 5".

Step 6: Install the mesh with hotglue as shown below.

Notes of the progression from your blueprint to your (various) physical prototype(s), including why and how aspects of your design may have changed:

Nothing major has changed. As we refined our ideas we had many more choices to make, which weren't included in the original plan, but overall we stayed true to the design.

Date:

Photos with captions of your full construction process from day 1 of building through to the last day of constructing your final prototype iteration:

Details about all steps of construction (add step numbers as needed), including the tools and manufacturing methods used:
