

Element G:

03/19/25 | Day 1

Pictures:

Sketch

Cutting Foam

Entry: During class, we worked on our model and sketch to have the idea of how we wanted our scale prototype to look like and make sure that it followed the prototype we chose. We also worked on the measurements and scaled them down to a 1:3 ratio. After talking and discussing our measurements and fixing our sketch we created our Element G document and we started to cut foam, however we didn't fully finish.

These are our scaled measurements of a 1:3 ratio:

MEASUREMENTS:

Main Desk Area

Width: 50 in | 16.5 in

Depth: 20 in | 6.5 in

Height: 30 in | 10 in

Cabinets:

Width: 14 in | 4.5 in

Depth: 20 in | 6.5 in

Height: 27 in | 9 in

Monitor Level:

Width: 50 in | 16.5 in

Depth: 8 in | 2.5 in

Height: 2 in | 0.5 in

Legs of Monitor:

Width: 2 in | 0.5 in

Depth: 8 in | 2.5 in
Height: 2 in | 0.5 in
Legs:
2x2 in

03/20/25 | Day 2

Pictures:

Labeling our foam pieces

Cutting the measured foam

Entry: Today, we continued, measuring out the foam board for our miniature scale models. We cut those pieces out and labeled them in order to ensure that we can keep track of what we have done and not confuse our measurements with the parts of the scaled model design prototype. We also discussed with Mr. R.N about using waterfall legs for our cabinets. He let us look at the different options that we could do with the cabinet and showed us the wood that he was donating to us.

03/21/25 | Day 3

Pictures:

Painting the legs

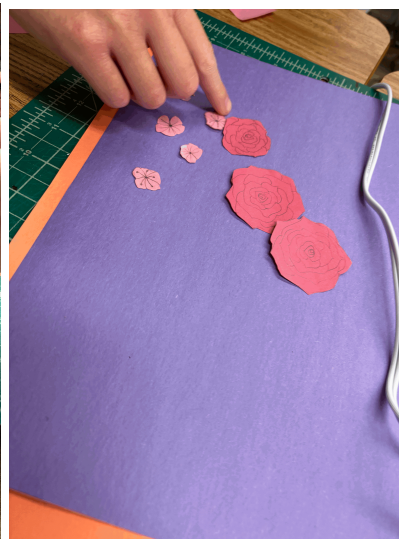

Gluing process

Entry: A member of the group continued to measure out the foam board and cut out all the different sections for our table. Our other members of the group on fixing the necessary pieces of the desk and the EDJ. She added pictures of us finishing up the skating, and starting to put the desk together. In addition, we started to make the pull-out drawers of the desk and started to paint the desk. Furthermore, we are 2/4 of the way done where we need to finish assembling the desk, painting it, and creating the powerstrip that will come with the desk.

03/24/25 | Day 4

Building Outlet

Flowers for resin art

Entry: Today, we faced a minor inconvenience, we forgot to bring our main desk to work at school because we accidentally left it at one of our group members' home when we went to work on it on our own time. Despite that, we made today we started to work on the features and details that will be

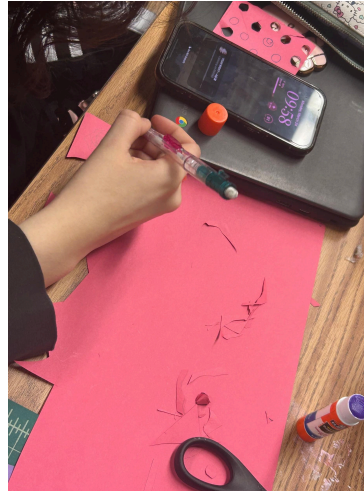

included in the desk. Two of our members started to make flowers for our scaled model prototype the resin art with the inclusion of these flowers. Furthermore, another member started working on the power strip that will be included on the desk and someone else continued to work on the EDJ and element G.

03/25/25 | Day 5

Cutting out foam pieces

Finishing up the flower pieces

Sanding pieces of structure

Entry: We continued to finish cutting our integral parts of the structure of our desk. We kept on cutting out pieces of foam and cardboard that we were measuring out specifically based on the 1:3 ratio of measurements. In addition, we were also sanding out the parts such as the legs of the desk and the cabinets, shelf, monitor shelf in order to ensure that the final design of our first prototype would be smooth, aesthetic, and have no flaws when it comes to assembling the prototype.
