Element L: Presentation of Designer's Recommendations

Content of Recommendations (L1, L2)

In K3, you provided the general lessons you learned related to engineering design. Now, you are asked to provide recommendations for continuing work on this project.

Answer these questions with **specific recommendations** based on your testing data, expert/stakeholder feedback, and any new research you've gathered. These recommendations may include process improvements (how you worked) and/or project improvements (actual design-specific decisions you made).

Provide recommendations to someone doing a similar project that might build or continue upon your work. For example: "Taking into account <something we did>, we believe doing _____ would improve _____ because _____."

- What could be done next to go further with this project?

We should add sprinklers to help spread the water more and test multiple different kinds of sprinklers to see which works best. We could also test whether the hose connection is good and watertight. We should then test out the maintenance system by experimenting with different solutions of bleach diluted with water and their effectiveness in removing mold.

- What would you keep if you did the project again? **Generate a consistently detailed list** of what would be kept in the prototype or testing plans. (4-5 sentences.)

We will keep the pipe, the holes, the hose connector, and the end cap. These parts all work well. The pipe is made of good material. The holes allow for water to flow. The hose connector allows the water from hose to flow into the pipe. The end cap prevents water from escaping through the other end.

Class: _____

- What would you change in your current prototype or testing plan? **Generate a consistently detailed list of HOW these details would be implemented.** (4-5 sentences.)

We would adjust the length of the pipe, adjust the size of the hole to allow for more water flow, and add sprinklers. The length of pipe is currently too short. The holes are too small and doesn't allow much water to flow through them, so we might increase the size to 6mm. Sprinkles would help spread the water out more.

- What would have made this project easier for you to complete? **Generate a consistently detailed list of things that would make the project easier.** (You may make a list or use 4-5 sentences.)

It would have been easier if we had better communication about who's doing what and who will be in class on which days. It would also be better if we communicated more with our stakeholders and received more feedback.

Step L: Presentation of Designer's Recommendations						
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
L1. Content of recommendations. Recommendations include _____.	specific and detailed ways the project can be improved and a rationale for why they are needed	specific and detailed ways the project can be improved	some specific ways the project can be improved	one way the project can be improved	vague recommendation(s) for improvement of the project	no recommendations for improvement of the project
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
L2. Detailed plans for implementation of improvements. Plans for implementation of	consistently detailed	generally detailed	minimally detailed and may include	partially detailed and/or	vague/unclear or minimally	not offered
