

Element L: Presentation of Designer's Recommendations

Recommended Improvements:

- Replace foam with sealed polystyrene float blocks
- Secure tether-mounted float pods every 2 feet
- Simulate competition run-throughs at least 2 weeks prior
- Train with full operator crew in mock-task sequence
- Pre-print cable and wiring diagrams for field repair

Plan: All recommendations scheduled for next prototype build starting [insert date], with full documentation and tracking logs to be submitted for review.
