

Element L: Presentation of Designer's Recommendations

L1

Mr.Lopez recommended us to buy a barrel instead of building one because it would be a very difficult process of us making the barrel while making a draft of it, etc.

He also recommended that we should get some type of water mixture that would kill grasshoppers and mosquitos who could probably jump in the water.

L2

We decided to order our barrel from the government and unfortunately after waiting a week for a response after emailing them. They told us that we would have to wait even longer for the barrel to actually come which made us disappointed. We just ended up ordering one from amazon using funds from school.

For the water powder Mr.Lopez said he would supply us with it in the future.
