

PART L. Presentation of Designer's Recommendations

If we were to complete this project again, I would've chosen a different timeline. During the second semester, especially in senior year, it is difficult to make time to design a project as big as this with only two people. In addition, it is hard for our stakeholder, a school staff member, to make time to organize and communicate with us due to their busy schedules. I would've also liked to incorporate the students of the Elementary-Middle schools in order to get some ideas from them. Taking a trip to all Elementary-Middles schools in the county before starting the design also would've helped get a better understanding of the setting that we are working with. Given the resources and information we had, I believe that overall, the designs of the murals will be effective when considering their effects on the schools and students.
