

Element I: Data Collection

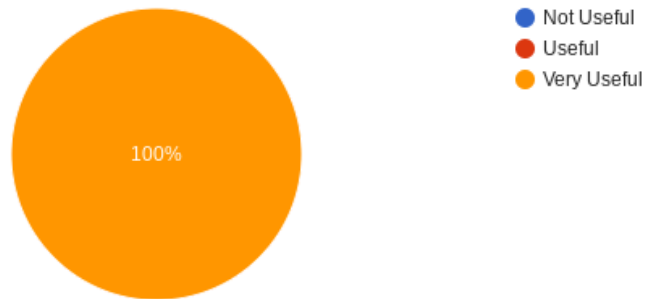

- From our planned experiment, it was found that both individual shelves could hold more than 10 pounds which proved our goal to be true.
- This is a photo of our results of the test

Test & Evaluate			
WEIGHT TESTING			
TOP SHELF		BOTTOM SHELF	
Number of books	Sturdy?	Number of books	Sturdy?
1	Yes	1	Yes
2	Yes	2	Yes
3	Yes	3	Yes
4	Yes	4	Yes
5	Yes	5	Yes

By using the would you find it useful?

1 response

Did you appreciate the adjustable shelves?

 Copy

1 response

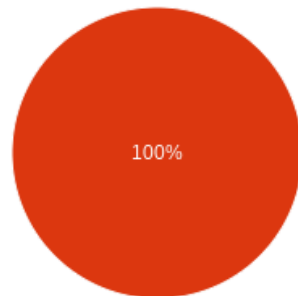

- Yes
- No
- Didn't matter

Did you have any trouble with the setup of the shelf?

 Copy

1 response

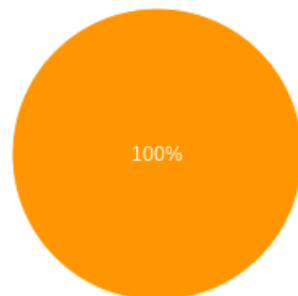

- A little
- Not Really

Will the drawings on the side be sufficient enough to add some liveliness to the classroom?

 Copy

1 response

- Ehh
- I guess, could be better though
- Definitely

If "Ehh", how could we improve upon this aspect of our design?

1 response

The decoration of the classroom is an important part of the setting, so I really appreciated the extra effort to decorate the shelves.

What additional comments do you have?

1 response

The adjustable shelves are a bonus. The increased storage for lab supplies and hard copy lab packets is a very much appreciated.
