

Element A Part 2

AT - 6 points

Stakeholder Concerns and Connections (A3, A4)

1. Identify at least three to five main stakeholders or groups of stakeholders. These are the people who are most affected by the problem.
2. Make a list of these stakeholders. Explain the concerns of your main stakeholders and use this to show why it's important to solve the problem.
3. Make sure to say if the stakeholders are primary (directly affected) or secondary (indirectly affected).

Start with the people who are most affected by the problem.

Who are your Stakeholders?	Are they Primary or Secondary stakeholders?	Why are they stakeholders? What are their concerns?
Mr. HS	Primary	Mr. HS is the main client. He needs a reliable method to store materials and first aid supplies.
Mr. HS's students	Primary	They are direct associates of Mr. HS. I don't think they even know this is happening
Ms. Smith	Secondary	You are our teacher(CEO). We get a good grade.
admin/other teachers(if scalable)	Secondary	If this becomes scalable then other teacher would be applicable for acquisition of the product.
