Image:

Details: This is a wooden house that is meant to house rabbits safely. It even has ramps and lots of space for the rabbits named Peter.

Analysis: Looking at the rabbit house it looks to have a good stable foundation which is good seems like its good for 1-4 rabbits

Prior Design Attempt #2 - <insert name of prior design attempt #2>

Source- <https://www.westleysworld.com/the/files/indoor-setups>

Image:

Details- The cage features a generous hay area with soft bedding blanketing the floor. Tunnels and hideouts are thoughtfully positioned alongside food and water bowls, while toys are strategically placed to create distinct zones for resting, eating, and playing.

Analysis: Overall, the setup is both spacious and thoughtfully designed, offering excellent enrichment and comfort while encouraging natural movement and behaviors.

Prior Design Attempt #3 - <insert name of prior design attempt #3>

Image:

Details: This is made out of wood and has wires as the windows and some doors that you can open to easily get them out.

Analysis:

Prior Design Attempt #4 - <insert name of prior design attempt #4>

Source: <https://www.bunniesandbeyond.org/habitat.html>

Details: This area allows the bunnies to have room to run and places to hide and sleep in. and this also allows the person to clean and access for easily

Analysis: Overall this area is well designed and spacious for the bunnies to run around and hide and offers amazing comfort.

Prior Design Attempt #5 - <insert name of prior design attempt #5>

Source: <https://www.pinterest.com/pin/8725793025359386/>

Image:

Details: This is a wooden house that has spots they can climb and two big doors that can open so the owner can easily access them and can easily clean the house.

Analysis: This enclosure is good because there are 2 doors that are in a way that you can get to anything in the enclosure. We can add different modules, connected by tubes, and the rabbits would be able to travel between them. Overall, this is a good pick, because it can be easy to clean, you can get to the animals, and there are no sharp parts or ways that the rabbit can get out or chew anything.
