

Element B: Documentation and Analysis of Prior Design Attempts

Prior Design Attempt #1 - Custom rabbit playground plan

<https://www.etsy.com/listing/4352255144/custom-bunny-playground-plan-for-claire>

Details

Open space for visibility, relatively easy to clean, looks somewhat safe, dark areas for rest, ramps

Analysis

I don't think you could have a area for the small rabbit without the big rabbit getting in. The staff said the want a area for each rabbit to be separate if need be.

This Rabbitt cage is easily accessible, hard to chew through, provides areas where the rabbits can move places, not toxic to the rabbits, and has an easily openable door to retrieve the rabbits. There is also no sharp brackets visible in this design so the rabbits are safe.

This design would be too big for the requirements of the wildlife center and might not be as easy to clean.

Image

The size is small and the rabbit may not be able to run, hop, and stretch in it like it's suppose to. It does however have a way for you to have a clear view on the rabbit at all times which is good.

Analysis

It is not very spacious, there is no way for the rabbits to be separated by size, and looks like it would be hard to clean. It does have visibility, being small, and play space.

Details

Very visible, not overly accessible for rabbits, easy to move, has a stable material.

Analysis

It is honestly just big and open, but I don't know if it would be suitable enough for two rabbits. There needs to be more to the cage than just a square holding them in.
