Element B Initial Template

Element B: Documentation and Analysis of Prior Design Attempts

Prior Design Attempt #1 - <Rabbit Shelter #1>Joseph

Source

Analysis

It has sharp edges and wheels for easier move around and there is places where you can get the rabbit from everywhere, the material being wood makes it so that the rabbit can chew on the cage without being hurt by chemicals while also giving the rabbit places where it isn't in the open and can be alone

Prior Design Attempt #2 - <Rabbit Shelter #2>Rahaf

Source

<https://www.aosom.com/item/pawhut-47-rabbit-hutch-outdoor-bunny-cage-with-run-removable-tray-ramp-2-story-wooden-rabbit-house~1D458J41LK001.html?srsId=AfmBOor6axQdK4OBIKO3bD8Aie65RvFUU0UkpCxTqZl4VC1xndBSTEh2>

Image

Details

- Complex and see through.
- 47.25" x 21.75" x 31.5"
- Wooden Rabbit Hutch Outdoor with Run, Metal Frame, 2-Story Bunny Rabbit Cage with Removable Tray, Ramp, Bunny Hutch with Space-Saving Design for Rabbits
- 45.1 lbs
- Easy to Clean: A pull-out tray allows for easy maintenance. When you need to clean the cage, all you need to do is slide the tray out, clean it, and slide it back in.

Analysis

Sharp edges , heavy , and not too complex enough for two

Prior Design Attempt #3 - <rabbit shelter#3>Braydon

<https://www.tractorsupply.com/tsc/product/precision-rabbit-playhouse-hutch-45000d-1458930?store=165>

Image

Details 41.5 in. x 32 in. x 33 in.

This small animal hutch features a slide-out pan and a private hideout box. It also comes with ground level access with a ramp door for easy in and out.

Analysis

Its heavy to carry

It has sharp edges

Not too complex for two rabbits

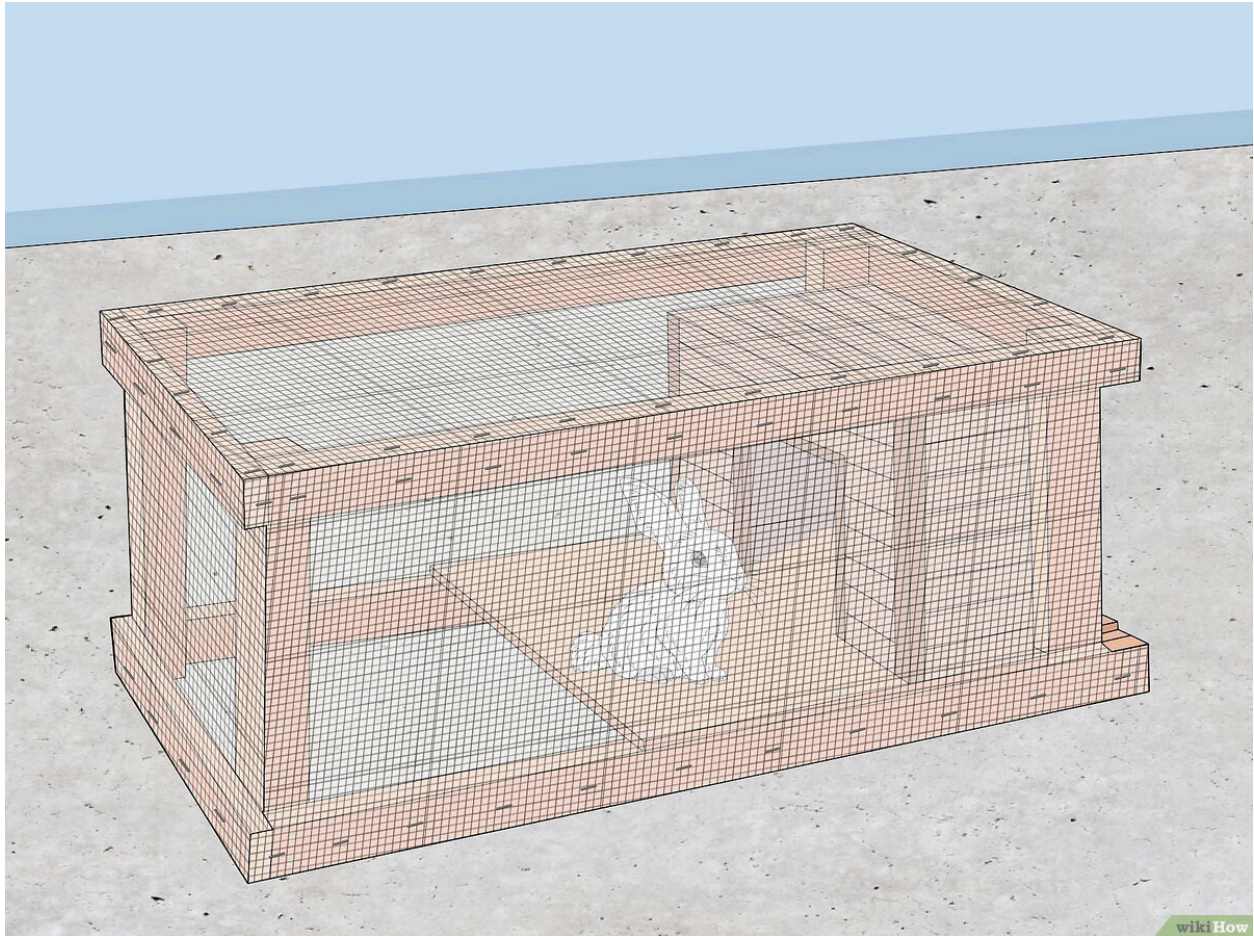

doesn't seem to be easy to be cleaned out.

Prior Design Attempt #4 - <insert name of prior design attempt #4>Alexis

Source

<https://www.wikihow.com/Make-a-Rabbit-Cage>

Image

Details

-The basic shape of the rabbit cage is made up of two wooden frames connected by four posts. Purchase 2 in (5.1 cm) by 4 in (10 cm) wood from your local hardware store and use a wood saw to cut them to the appropriate lengths. Once completed, the cage will measure 6 feet (1.8 m) long by 3 feet (0.91 m) wide and 2 feet (0.61 m) tall, which is enough for 2 or 3 medium sized rabbits.

- 4 pieces that measure 3 feet (0.91 m) in length, 4 that measure 2 feet (0.61 m), and 4 that measure 6 feet (1.8 m).
- Will need one piece of plywood that measures 3 feet (0.91 m) by 2 feet (0.61 m). You can either cut that yourself or purchase a piece of that size from your local hardware store.
- Always wear eye protection when sawing wood

Analysis-

-Sharp edges which can injure rabbits or the people passing

-Needs tunnels and places to hang toys and a smaller area so dandelions can escape.

Prior Design Attempt #5 - <Rabbit outdoors: lowering risk>Andrew

Source

<https://rabbit.org/care/rabbits-outdoors-lowering-risks/>

Image

Details

This is a rabbit shelter made out of wood, tarp, and colorful blocks. It looks to have sharp edges but is a relatively nice shelter.

Include main details about this prior design attempt

Analysis

Provide evidence and explain what parts of this prior design attempt were unsuccessful at solving the defined problem and why based on design requirements.

The sharp edges and doesn't have two layers
