

Element B

5 sources

- peer reviewed
 - published since 2021 (can go back a few years (5) for more information)
1. **'A review of welfare indicators for sea turtles undergoing rehabilitation, with emphasis on environmental enrichment'**
 - Published in *Animal Welfare*, 2022.
 - This article talks about how the environment and enrichment (like toys, basking spots, or things to explore) affect the health and happiness of sea turtles in rehab centers.
 - It's useful because it shows that turtles do better when their space is interesting and comfortable — which helps when explaining why a turtle home should include things like basking areas, hiding spots, and good flooring.
 - [JCU Research Online](#)
 2. **'Moving Toward Evidence-Based Care: Measuring Preferences in Zoo-Housed Aquatic Turtles Using 24-h Remote Monitoring'**
 - Published 2024
 - This study looked at what kinds of environments aquatic turtles like best by watching them with cameras all day. It tested what floor type (substrate), lighting, and features they preferred.
 - it shows what turtles enjoy and need — like good lighting, basking spots, and the right mix of land and water
 - [PubMed](#)
 3. **'Designing a better nest to help endangered turtles'**
 - Published in *Restoration Ecology*, 2024.
 - This study tested a new way to build nesting areas for freshwater turtles in rocky places and found that more turtle eggs successfully hatched.
 - It's helpful because it shows what kinds of materials and designs work well for turtle habitats — like using natural materials, good drainage, and proper nesting surfaces.
 - [EurekAlert](#)
 - [WaterlooNews](#)
 - [ScienceDaily](#)
 4. **The conundrum of turtle and tortoise basking: A critical review**
 - Published: 2024, Journal of Zoology

- This source explains why turtles and tortoises bask — to warm up, dry off, and stay healthy — and how things like temperature, sunlight, humidity, and people nearby affect that behavior. It also compares how different species bask in different environments.
 - [JournalOfZoology](#)
5. Seasonal, Environmental and Anthropogenic Influences on Nocturnal Basking in Turtles and Crocodiles from North-Eastern Australia
- Published: in Austral Ecology, 2023.
 - This article looks at how things like temperature, sunlight, habitat setup, and humans around affect nighttime basking in freshwater turtles and crocodiles.
