### Element B: Documentation and Analysis of Prior Design Attempts

#### Prior Design Attempt #1 - <This or that card Game

#1><https://www.amazon.com/THIS-THAT-Party-Game-Christmas/dp/B0FDJRSS21>

**Amazon.** “*THIS OR THAT Party Game – Christmas Edition.*” Amazon, <https://www.amazon.com/THIS-THAT-Party-Game-Christmas/dp/B0FDJRSS21>

This prior design attempt is sold on Amazon, and is designed to be a “fun family guessing party game”. Where each player follows a series of choices until the game ends at 8 different possible destinations. The game was made competitive by adding in a scoring system.

#### *Analysis*

This This or That game product is designed for family or group to use. Many of the strengths of the product’s design become useless or inhibitory to how Mrs. Hybarger wishes to use the This or That challenge station. For example, the number of cards and options introduce reusability in the original design, but becomes impossible to utilize effectively with the passive nature that the design Mrs. Hybarger must fulfill. In order to play properly the Amazon product must be played by a group for an extended period of time, which is completely incompatible with Mrs. Hybarger’s requirements of quick and easy use, small dimensions, and minimal number of parts to the design

## Prior Design Attempt #2 - <This or That bulletin board>

<https://www.teacherspayteachers.com/Product/Would-You-Rather-This-or-That-Bulletin-Board-Decour-about-Books-for-Readers-9348743>

**Bookish Creations.** “*Would You Rather / This or That Bulletin Board Décor about Books for Readers.*” *Teachers Pay Teachers*, 2024, <https://www.teacherspayteachers.com/Product/Would-You-Rather-This-or-That-Bulletin-Board-Decour-about-Books-for-Readers-9348743>

This This or That Challenge station is a simple bulletin board that optimizes for ease of construction by just sticking questions on a board. The board is also designed to be aesthetic

While this bulletin board design is easy to use and satisfies the requirements of passivity, physical size, ease of use, and number of parts. The design fails to be interactive. The design has no way of actually being interesting.

**Prior Design Attempt #3 - <Icebreaker: This or That>** [https://cdn.prod.website-files.com/67ac03149d7f8aa5e9605954/67be219b50ef28ffa4542504\\_Icebreaker\\_This\\_or\\_That.pdf](https://cdn.prod.website-files.com/67ac03149d7f8aa5e9605954/67be219b50ef28ffa4542504_Icebreaker_This_or_That.pdf)

**“Icebreaker This or That.”** *Webflow*, [https://cdn.prod.website-files.com/67ac03149d7f8aa5e9605954/67be219b50ef28ffa4542504\\_Icebreaker\\_This\\_or\\_That.pdf](https://cdn.prod.website-files.com/67ac03149d7f8aa5e9605954/67be219b50ef28ffa4542504_Icebreaker_This_or_That.pdf)

This design attempt for a This or That Challenge Station is entirely digital, it is merely a collection of slides. Although, this design is exceedingly simple to use, it is not a physical construction and thus reduces how interactive and interesting it is.

#### **Prior Design Attempt #4 - <Would you rather Jar/Question of the Week>**

<https://thelibrarylab.substack.com/p/passive-programming-for-your-school>

**The Library Lab.** “*Passive Programming for Your School Library.*” *Substack*, 12 Feb. 2024, <https://thelibrarylab.substack.com/p/passive-programming-for-your-school>

The design is two different jars with a prompt this or that question above it.

While this design is simple and easy to use and is a passive activity, it lacks any interesting elements that are required to make a successful interactive This or That challenge station that Mrs. Hybarger wants.

**Prior Design Attempt #5 - <This or That party Game.>** <https://www.amazon.com/This-or-That-Party-Game/dp/B0B6D4NDPJ/>

Amazon. “*This or That Party Game.*” Amazon, <https://www.amazon.com/This-or-That-Party-Game/dp/B0B6D4NDPJ/>

This This or That Game product from Amazon is designed to be played for fun with a group of people and to be thought-provoking. Its compact nature and little complexity are also beneficial to the overall quality of the design. However, it is advertised as having a lot of game cards, making it non-minimal in number of components. In addition, like many other designs it lacks the ability to be interactive with its users while still being a passive activity, which are required.
