Element B Initial Template

How to use this template

Students: The template below is one way to structure your research findings around past and current attempts to solve the problem, but the specific assignment given by your instructor may require a different structure or dictate different details. ***If you make a copy of this template to edit for your research into prior design attempts, be sure to delete the instructions.***

Element B: Documentation and Analysis of Prior Design Attempts

Prior Design Attempt #1 - <insert name of prior design attempt #1>

Include main details about this prior design attempt

Analysis

Provide evidence and explain what parts of this prior design attempt were unsuccessful at solving the defined problem and why based on design requirements.

Prior Design Attempt #2 - <(Done by Taha) Carrier™ Charging Carts #2>

Source: <https://www.lockncharge.com/charging-carts/carrier-charging-carts>

Image

Carrier™ 30

Name: _____

Date: _____

Class: _____

Carrier™ 40

Include at least one image of this prior design attempt. Make sure to cite all images.

Details

The Carrier 30 Cart by Lockncharge is a charging station that is mobile, it is designed to store and secure 30 chromebooks or laptops at one time while they are getting charged. The cart has individual device slots, internal cable management that reduces chargers tangling, and a universal locking front door to stop theft. It is mounted on wheels, so it can move and is used in schools to manage classroom chromebooks. The design mainly focuses on locking and organized charging of the chromebooks.

Name: _____

Date: _____

Class: _____

According to Lockncharge, the product description itself says the cart is built to improve device management in k-12 schools by reducing clutter, preventing loss, and making sure devices remain charged for classroom use.

Analysis

While the LocknCharger Carrier 30 cart solves the problem of a secure chromebook storage and charging solution, it does not fully meet the specific needs of Mr. HS's classroom problems. The cart is large and it is used for multiple classrooms/ school wide rather than daily single classroom organization. It does not include any space for storing general supplies like tissues, staplers, markers, wipes or drawers for other classroom materials. Also, it is super expensive (The pricing is not clear and needs a form to be filled but seen it go for over \$1000) which is way beyond the classroom budget and not good for a single classroom solution.

Another limit is that the cart only solves chromebook management not the other needs of Mr. HS's classroom like marker trays or sliding holders for white board supplies. In conclusion, while it effectively reduces chromebook theft and charging issues, it does not give us a multi functional organization solution, that is a key requirement for the problem we defined.

Prior Design Attempt #3 - <insert name of prior design attempt #3>

Source

State the source of the information about this prior design attempt, which should be taken from any of the following credible source categories: peer-reviewed journals (check out your public library for free digital access to journals; here are some [free online journals and research databases](#)), professional organizations, government agencies, local and national newspapers, patents (here is a [patent search site for the United States Patent and Trademark Office](#)), and reputable vendors and manufacturers. Make sure to incorporate in-text citations in the details section below (i.e. don't just give a list at the end of the element or footnote).

Rubric

Element B: Documentation and Analysis of Prior Design Attempts						
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
B1. Documentation of plausible prior attempts to solve the problem and/or related problems is drawn from _____.	a wide array of clearly-identified and consistently-credible sources	a variety of clearly-identified and consistently-credible sources	several—but not necessarily varied—clearly-identified and generally-credible sources	a limited number of sources, some of which may not be clearly identified and/or credible	only one or two sources that may not be clearly identified and/or credible	missing or minimal (a single source that is not clearly identified and/or credible)
	score = 5	score = 4	score = 3	score = 2	score = 1	score = 0
B2. The analysis of past and current attempts to solve the problem — including both strengths and shortcomings —	is consistently clear, detailed,	is clear, generally detailed, and	is generally clear and contains some detail	is overly general and contains little detail	is vague and is missing any relevant details	cannot be inferred from information
