Design Viability Description	Connection to Design Requirement	Credible Evidence?
Our Design can covers the plant with shade when needed.	Design must be able to control the amount of sunlight the plant gets.	The fabric blocks most of the sun's rays.
Our design is controlled with a set timer to move it for us.	The design must be able to work on its own.	The timer is programmed to move throughout the day.
Our design is powered by two 8 volt batteries.	The design must be able to hold a charge for a set amount of time.	The batteries can fully power our motor in short bursts to save charge.
