

Element F

Design Viability Description	Connection to the Design Requirement	Credible Evidence
It needs to provide sun protection	Must provide 8 hours of shade to the plant.	In the criteria it is a requirement.
Timer and batteries need to be waterproof	The timer and battery won't work if It gets wet.	The whole platform would not rotate if it wasn't waterproof.
Support a good amount of plants	Must hold 10 pounds	This was a part of the criteria
Needs to be programmable.	It needed to use some type of programmability/timer.	In the criteria it is a requirement.
Size needs to hold bigger and smaller plants	Needs to be a 10 by 20 in platform	It was in the criteria
Durability, needs to be durable	It needs to be able to withstand weather and not break.	The platform would just break if it wasn't durable.
