MyDesign Portfolio

Element F Initial Template - AT - 3 points

How to use this template

Students: The template below is one way to assess whether your proposed solution is viable and realistic, but the specific assignment given by your instructor may require a different structure or dictate different details. If you make a copy of this template to edit, be sure to delete the instructions.

Element F: Consideration of Design Viability

Judgment about Design Viability (F1)

"Design viability" is the capacity of the proposed solution to solve the problem. Design viability refers to how your design decisions are tethered to your design requirements. For example, if one of your design requirements is that the total cost of the prototype cannot exceed X, then you could present a table of costs for each component of your proposed design solution as justification for why your design is likely to meet that requirement.

"Credible evidence" means it shouldn't just be your hunch that this will work. Be creative about how you validate the viability of your design. You should go beyond just having a stakeholder or expert reviewer say that the design seems viable. For example, you could point to evidence that a sub-system already functions, or you demo a proof of concept, or you've discussed with an expert that said, "I've seen something similar work in this other related situation...", etc.

Use as many rows as needed. Remember, this chart below may help you organize your ideas, but you will need to actually execute the "credible evidence."

Design Viability Description	Connection to Design Requirement from Element C	Credible Evidence?
For the robot we need a heating plate so that it can melt the ice		I've seen that this similar idea was used for

Name: _____

Date: _____

Class: _____

and a way to power it		Autonomous Snowplows and De-Icing Robots.
<i>Example: The solution is inexpensive</i>	<i>Example: Design does not cost more than \$X</i>	<i>Example: Create a table of costs for each component of the solution.</i>
Radiant Heating cable	\$130	Evidence
Aluminum sheets	\$9	Evidendce
ceramic PTC	\$10
